Digital Muscle Stimulation Unit Beurer Em 80 End Of

The LG-7500 Digital Electrical Muscle Stimulator is a proven way of treating muscular injuries, muscle atrophy, and rehabilitation. It works by sending electronic pulses to the muscle or muscles needing treatment. This causes the muscle to contract and exercise passively. Electronic Muscle Stimulators (EMS) are used for both medical treatment and cosmetic purposes (conditioning and toning).
Amazon.com: tens muscle stimulation
A Beurer abdominal toning belt is recommended for those wanting to use electrical muscle stimulation to primarily focus on the stomach area. Our abdominal toning belts are easy to use and easy to fasten with a hook-and-loop fastener. An LCD display with clear symbols makes operation even more straightforward.
Beurer develops and produces EMS and TENS devices and offers a wide range of devices for transcutaneous electrical nerve stimulation and electrical muscle stimulation. Ideal for regeneration.
