Weaving together military operations and strategies with political strategy and civil-military relations, the author covers the most active phase of the Korean War, the 12-month period from North Korea's invasion of

portray the nuclear threat differently on film. American science fiction movies of the 1950s and 1960s generally proclaim that it is possible to put the nuclear genie back in the bottle. Japanese films of the same period assert that once freed the nuclear genie

reasons point to the strength of Zionism among the Jews in Iraq and their commitment to Zionist education. others see the cause as a combination of Iraqi government anti-semitism and the effectiveness of the zionist underground. This first volume of Allan H. Meltzer's history of the Federal

Page 9/118

Reserve System covers the period from the Federal Reserve's founding in 1913 through the Treasury-Federal Reserve Accord of 1951. To understand why the Federal Reserve acted as it did at key points in its history, Meltzer draws on meeting minutes, correspondence, and other internal

Page 10/118

documents (many made public only during the 1970s) to trace the reasoning behind its policy decisions. He explains why the Federal Reserve remained passive throughout most of the economic decline that led to the Great Depression, and how the Board's actions helped to produce the

Page 11/118

deep recession of 1937 and 1938. He also highlights the impact that individuals had on the institution, such as Benjamin Strong, governor of the Federal Reserve Bank of New York in the 1920s, who played a large role in the adoption of a more active monetary policy by the Federal Reserve. From attempts to build

Page 12/118

a new international financial system at the London Monetary and Economic Conference of 1933 to the Bretton Woods Agreement of 1944 that established the International Monetary Fund and the World Bank, Meltzer also examines the influence the Federal Reserve has had on international affairs.

Page 13/118

The second, and last volume of this history covers the years 1951 to 1986 in two parts. These include the time of the Federal Reserve's second major mistake, the Great Inflation, and the subsequent disinflation. The volume summarizes the record of monetary policy during the inflation and disinflation.

Situation: March,
1951 Farmers'
production
expenses in 1951
are expected to be
10 to 15 percent
higher than in 1950
when they reached

Page 32/118

the highest level on record. During the first three months of 1951, prices paid by farmers for production items, interest, taxes, and wage rates averaged 12 percent higher than in the same months of 1950 and 13 percent higher than in 1949, and for the

Page 33/118

year, will average higher than in any previous year. However, total production expenses will be up even more than prices of production items because an increased quantity of goods and services will be needed for the record farm

Page 34/118

production in
prospect for this
year. Supplies of
some production
items are expected
to be short.

However, record
farm production
probably can be
attained if available
supplies are
properly
distributed. Not
only will most

production goods
and services cost
more in 1951, but
other expense
items will be up.
With farmers using
more credit, total
interest payments
will increase. Taxes
also will be higher.
Those buying land
will find that prices
are substantially

Fiananced by

under the

this project
has attempted a
unique and
systematic
operation to

then to make
readily

those archives
that provide
the
indispensable
source material
for the

the project but
opens up the

history.

In 1953, Edmund Hillary and Tenzing Norgay reached the summit of Mount Everest. They climbed from the south, from Nepal, via the Khumbu Glacier - a route first pioneered in

Page 72/118

1951 by a
reconnaissance
expedition led
by Eric
Shipton.

Everest 1951 is
the account of
this
expedition. It
was the first
to approach the
mountain from
the south side,

Page 73/118

it pioneered a route through the Khumbu icefall and it was the expedition on which Hillary set foot on Everest for the first time. Everest 1951 is a short but vitally

Page 74/118

important read
for anybody
with any
interest in
mountaineering
or in Everest.
The 1951
Everest
Expedition
marked the
public
highpoint of
Shipton's

Page 75/118

mountaineering
fame. Key
information was
discovered and
the foundations
laid for future
success.

Despite this,
Shipton's
critics felt he
had a 'lack of
trust' and thus
failed to match

Page 76/118

the urgent mood
of the period.
Despite having
been on more
Everest
expeditions
than any man
alive, he was
'eased' out of
the crucial
leadership role
in 1953 and so
missed the huge

Page 77/118

public acclaim
given to
Hillary,
Tenzing Norgay
and John Hunt
after their
historic
success.

With nearly a

Analysis has
been
continuously in

Page 92/118

print for more than sixty years. No investment book in history had either the immediate impact, or the long-term relevance and value, of its first edition in 1934. By 1951, seventeen years

Page 93/118

past its
original
publication and
more than a
decade beyond
its revised and
acclaimed 1940
second edition,
authors Benjamin
Graham and David
Dodd had seen
business and
investment
markets travel

Page 94/118

from the depths
of Depression to
the heights of
recovery, and
had observed
investor
behavior during
both the calm of
peacetime and
the chaos of
World War II.
The prescient
thinking and
insight

Page 95/118

displayed by
Graham and Dodd
in the first two
editions of
Security
Analysis reached
new heights in
the third
edition. In
words that could
just as easily
have been
written today as
fifty years ago,

Page 96/118

they detail
techniques and
strategies for
attaining
success as
individual
investors, as
well as the
responsibilities
of corporate
decision makers
to build
shareholder
value and

Page 97/118

transparency for
those investors.
The focus of the
book, however,
remains its
timeless
guidance and
advice--that
careful analysis
of balance
sheets is the
primary road to
investment
success, with

Page 98/118

all other
considerations
little more than
distractions.
The authors had
seen and
survived the
Great Depression
as well as the
political and
financial
instabilities of
World War II and
were now better

Page 99/118

able to outline
a program for
sensible and
profitable
investing in the
latter half of
the century.

The opening months of 1951 comprised the first winter of the Korean War, and the fighting was as intense as the weather. In *The Line: Combat in Korea, January-February 1951*, William T. Bowers analyzes this significant

period and its effects on the remainder of the war. The Line is the first of three volumes about the Korean War that focus on combat experiences at the ground level: from battalion hierarchy to the

individual
soldiers. Drawn
from interviews
conducted by
Army historians
immediately
after combat,
the books in
this series
offer intensive
examinations of
military
conflict.

indeed a
predicament to
have to man our

not to neglect
our fields. It
reminds me of
the frontier

that we produce
the weapons.
Furthermore, we
cannot neglect
the essential
public services,

the utilities,
housing, the
