'At last, a volume on civilization that truly reflects the complexity of multiple civilizations. The wealth of contributions Arjomand and Tiryakian have assembled demonstrates the value of an old concept for understanding the awful dilemmas confronting human kind in the global age. Its thoroughgoing renewal here establishes this book as the essential benchmark for future scholars of civilization' - Martin Albrow, Founding Editor of International Sociology and author of The Global Age - winner of the European Amalfi Prize, 1997 'In our tension filled world, many are heralding, and others fearing, a 'clash of civilizations.' The contributors to this volume provides a healthy and persuasive argument about why this clash need not, and certainly should not, take place. They do so, moreover, not by rejecting the concept of civilization, but by developing a less primordial, homogenous, and essentialist concept of it. An important collection that provides illumination in this sometimes frighteningly dark time' - Jeffrey Alexander, Professor and Chair of Sociology at Yale University 'The concept of civilization may well replace the notions of globalization and identity as the core component in the vocabulary of 21st century sociology. The authors contribute a great deal to the clarification of fashionable controversies around the "clash of civilizations" and "multiculturalism". They go a long way toward purging the concept of civilization of its ideological overtones, and they succeed admirably in turning it into powerful analytic tool of an emerging field of macrosociology, known already as civilizational analysis' - Piotr Sztompka, President, International Sociological Association Although the concept of "civilization" has deep roots in the social sciences, there is an urgent need to re-think it for contemporary times. This book points to an exhaustion in using 'the nation state' and 'world system' as the basic macro-units of social analysis because they do not get to grips with the 'soft power' variable of cultural factors involved in global aspects of development. Also, globalization requires us to reconsider the link between civilization and a fixed or given territory. This book focuses upon the dynamic aspect of civilizations. Among the topics covered are: · Civilizational analysis and social theory · Global civilization and local cultures · Civilizational forms · Rationalization and Civilization · Civilizations as zones of prestige · Historical and comparative dimensions of civilization · The clash of civilizations.

This work is the first monograph devoted solely to Bombax ceiba, popularly known as the Red Silk Cotton Tree. Consisting of seven chapters, it covers all relevant aspects of this plant, from its historical and spiritual importance, to its botanical characterization, pharmacognostical details and ethnobiological uses, to its scientific validation in various animal and human studies. Each part of the tree is of medicinal value and possesses many novel chemical constituents such as thamminic, bombasin, bombamalone, bombamaloside etc. along with other bioactive secondary metabolites. The book presents the chemical structures of the most important constituents and highlights various pharmacological activities, predominantly antioxidant, anti-inflammatory, anti-mutagenic, hypoglycemic, hypotensive, hepatoprotective and fibrinolytic, which may prove to be a source for the development of a novel phyto-pharmaceutical agent to treat diabetes, heart disease and cancer. In addition, separate chapters deal with the commercial and ecological significance of B. ceiba, as well as a case study on its conservation. Numerous color illustrations are included to identify the plant and to justify its nickname, the " Little Bird ' s Cafeteria " .

A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This revised installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.making Senseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traicis™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, Making Sense of Data II is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization.

Although psychoanalytic theory is one of the most potent and influential tools in contemporary literary criticism, to date it has had very little impact on the study of African American literature. Critical methods from the disciplines of history, sociology, and cultural studies have dominated work in the field. Now, in this exciting new book by the author of Domestic Allegories: The Black Heroine's Text at the Turn of the Century, Claudia Tate demonstrates that psychoanalytic paradigms can produce rich and compelling readings of African American textuality. With clear and accessible summaries of key concepts in Freud, Lacan, and Klein, as well as deft reference to the work of contemporary psychoanalytic critics of literature, Tate explores African- American desire, alienation, and subjectivity in neglected novels by Emma Kelley, W.E.B. Du Bois, Richard Wright, Zora Neale Hurston, and Nella Larsen. Her pioneering approach highlights African American textual realms within and beyond those inscribing racial oppression and modes of black resistance. A superb introduction to psychoanalytic theory and its applications for African American literature and culture, this book creates a sophisticated critical model of black subjectivity and desire for use in the study of African American texts.

This volume is a collection of cutting-edge research papers written by well-known researchers in the field of Romance phonetics and phonology. An important goal of this book is to bridge the gap between traditional Romance linguistics -- with its long and rich tradition in data collection, cross-language comparison, and phonetic variation -- and laboratory phonology work. The book is organized around three main themes: segmental processes, prosody, and the acquisition of segments and prosody. The various articles provide new empirical data on production, perception, sound change, first and second language learning, rhythm and intonation, presenting a state-of-the-art overview of research in laboratory phonology centred on Romance languages. The Romance data are used to test the predictions of a number of theoretical frameworks such as gestural phonology, exemplar models, generative phonology and optimality theory. The book will constitute a useful companion volume for phoneticians, phonologists and researchers investigating sound structure in Romance languages, and will serve to generate further interest in laboratory phonology.

Koine Greek Grammar and its accompanying Workbook and Answer Key & Guide have been in the making for decades. It was first a small manual Kairos Greek Grammar; then it grew into a fully integrated and hyperlinked CD that has been published by Logos Bible Software (2005). Now, this current handbook--KOINE GREEK GRAMMAR: A BEGINNING-INTERMEDIATE EXEGETICAL AND PRAGMATIC HANDBOOK--has been thoroughly expanded to include my more explicit description of marked, emphatic, prominent, and pragmatic features of Greek, ideas that were nascent in KAIROS, but now grounded in a communication theory informed by Relevance Theory (Dan Sperber and Deirdre Wilson), Prominence Theory with reference to translation (Kathleen Callow), and Discourse Grammar and Pragmatics (Stephan Levinsohn, Stanley Porter, and Steven Runge). Exegetically significant aspects of Greek syntax and the use of the Greek language (i.e., pragmatics) occur strategically throughout KOINE GREEK GRAMMAR and include the following - conjunctions and their constraints- point/counterpoint sets- polysyndeton, asyndeton, correlative emphasis, and lists- fronted modifiers for emphasis (genitive, demonstrative, quantitative)- vocatives as thematic address- appositional statements- the historic present and the verb tense options in narrative- metacommments as orienting statements- interjections as attention getting devices- comparative, qualitative, interrogative, negative, and comparative types of emphasis- special uses of the noun cases- participle uses, including periphrastic and genitive absolutes- special uses of the Moods- left-(dis)locations- discourse pragmatic uses of the article- conditional and excoption clauses. Some of these discussions will have extended Intermediate-level treatments that are placed within greyed boxes. Other significant enhancements are the inclusion of CHECKPOINTED ANSWERS that give students a chance to practice what is being learned in each chapter along with (SUGGESTED) ANSWERS that immediately follow. Scattered throughout KOINE GREEK GRAMMAR are images of ancient realia, i.e., remnants of Medieterranean material culture including biblical and non-biblical papyri fragments, vase paintings, coins, bas-reliefs, important artifacts, inscriptions, funerary stele, statues, gems, temples, maps, and reconstructed scenes of life in the polis. The language and syntax of the Greek NT is contextually located in these worlds. Still present (but improved) are the CASE IN POINTS at the end of each chapter that briefly describe how particular points of Greek grammar just presented helps us when interpreting the Greek NT. In other words, the CASE IN POINT illustrates how Greek grammar is valuable as a tool for the study of the NT. In addition to having a full APPENDIX, VOCABULARY OF WORDS OCCURRING 20 TIMES OR MORE, and INDICES, KOINE GREEK GRAMMAR has a separate extensive WORKBOOK AND ANSWER KEY & GUIDE. That has been carefully crafted with many exercises drawn directly from biblical expressions and actual verses.

Fueled by media reports of gender bias in the schools, the debate over single sex education has been recently renewed. "Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? What do girls gain by being schooled with male peers? What is lost? In this longitudinal study of more than fifty high school girls at four New England independent schools, Carole B. Shmuraĸ follows their development from ninth grade through the first year of college. Case studies capture the girls' own voices as they describe their hopes for their futures and the events that subsequently affect those futures.
