Toyota's spectacular performance in the competitive and mature auto industry has been attributed to many factors. They

Page 26/60

are: Toyota's
corporate culture,
Kaizen philosophy of
continuous
improvement, Kanban
and Just-In-Time (JIT)
production systems,
zero defect goal, a
lean production
system, fast product
cycle, ringi or
consensus bottom-up
decision making,

Page 27/60

pursuit of highest customer satisfaction, and high quality products. This research suggests that although all these measures contributed to the outstanding performances of Toyota over the decades, the real driver of Toyota's decisions and actions

Page 28/60

is Toyota's purpose.
The study concludes
that Toyota is driven
by corporate purpose.
At Toyota, purpose is
clearly understood and
internalized by its
senior management.
The ideologies
embodied in purpose
provide a strong and
unifying mechanism
that stimulates the

Page 29/60

energies and efforts of its employees, and provides a moral compass to attain that meaningful, value-laden purpose of the organization. Toyota's purpose is crafted in its stakeholders power structure, its environment, and its cultural values and assumptions. Toyota's

Page 30/60

purpose is to be a well-balanced global corporation that is a contributing member of the local communities. It strives to attain this by taking care of its employees, suppliers, and local communities, and by improving the quality of life of people in these communities.

Page 31/60

The main drivers behind Toyota's strategic key decisions are pursuit of harmonious growth and enhancement of profitability. Toyota's strategic decisions are linked through its key objectives to its operative purpose, which also is its stated purpose.
