Forthcoming Books

Canada's automotive Dr. Phil says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In March 1999, Renault bought a controlling interest in Nissan. Only months before Renault's foray into the Japanese market, Toyota, Japan's most profitable car maker, announced its decision to build its latest European production facility in northern France. Although greeted with less media attention, Toyota's investment decision was equally remarkable. The author analyzes liberalization trends in both the Japanese and the European automotive markets and the reaction of manufacturers to such trends.
