1kz fuel system issue, any tips much needed - Offroad-Express

The fuel pump relay, a small electric unit which automatically opens and closes the fuel pump valve, controls the fuel intake of a Ford pickup. Location The fuel pump relay of a Ford pickup, also known as the fuel shut off switch, is located in the passenger foot well, behind the behind the kick panel and inside the fuse panel.

What is the Location of the Fuel Pump Relay on a Ford ...

The fuel pump relay is usually located in the vehicle's long black box with the other relays and fuses. The location can be different, however, in some other cars. Without this relay, the engine would not receive fuel while starting. The pump that delivers fuel to the engine while the engine is running requires electricity in order to operate.
