Jules Verne's 20,000 Leagues Under the Sea

"I am going to sink it." "You are not!" "I am," he coldly replied. "Do not take it on yourself to judge me, monsieur." French naturalist Dr Aronnax embarks on an expedition to hunt down a sea monster, but discovers instead the Nautilus, a self-contained world built by its enigmatic captain. Together Nemo and Aronnax explore the underwater realms of the globe, undergo a transcendental experience amongst the ruins of Atlantis, and plant a black flag at the South Pole. Nemo's mission is finally revealed to be a violent one-and his methods coldly efficient. Verne's classic novel has left a profound mark on subsequent centuries. Its themes are universal, its style alternately humorous and grandiose, its construction masterly. This new and unabridged translation brilliantly conveys the range of this seminal work. The volume also contains unpublished information about the novel's inception.

Twenty Thousand Leagues Under the Sea By Jules Verne

Verne was born in the seaport of Nantes, where he was trained to follow in his father's footsteps as a lawyer, but quit the profession early in life to write for magazines and the stage. Twenty Thousand Leagues Under the Sea: A Tour of the Underwater World
During the year 1866, ships of several nations spot a mysterious sea monster, which some suggest to be a giant narwhal. The United States government assembles an expedition in New York City to find and destroy the monster. Professor Pierre Aronnax, a French marine biologist and narrator of the story, who happens to be in New York at the time, receives a last-minute invitation to join the expedition, which he accepts. Canadian whaler and master harpoonist Ned Land and Aronnax's faithful servant Conseil are also brought aboard. The expedition departs Brooklyn aboard the United States Navy frigate Abraham Lincoln and travels south around Cape Horn into the Pacific Ocean. After a long search, the ship finds the monster and then attacks the beast, which damages the ship's rudder. The three protagonists are then hurled into the water and grasp hold of the "hide" of the creature, which they find, to their surprise, to be a submarine very far ahead of its era. They are quickly captured and brought inside the vessel, where they meet its enigmatic creator and commander, Captain Nemo. The rest of the story follows the adventures of the protagonists aboard the creature--the submarine, the Nautilus--which was built in secrecy and now roams the seas free from any land-based government. Captain Nemo's motivation is implied to be both a scientific thirst for knowledge and a desire for revenge upon (and self-imposed exile from) civilization. Nemo explains that his submarine is electrically powered and can perform advanced marine biology research; he also tells his new passengers that although he appreciates conversing with such an expert as Aronnax, maintaining the secrecy of his existence requires never letting them leave. Aronnax and Conseil are enthralled by the undersea adventures, but Ned Land can only think of escape. They visit many places under the ocean, some real-world and others fictional. The travelers witness the real corals of the Red Sea, the wrecks of the battle of Vigo Bay, the Antarcticice shelves, the Transatlantic telegraph cable and the legendary submerged land of Atlantis. The travelers also use diving suits to hunt sharks and other marine life with air-guns and have an underwater funeral for a crew member who died when an accident occurred under mysterious conditions inside the Nautilus. When the Nautilus returns to the Atlantic Ocean, a pack of "poulpes" (usually translated as a giant squid, although in French "poulpe" means "octopus") attacks the vessel and kills a crew member. Throughout the story Captain Nemo is suggested to have exiled himself from the world after an encounter with the forces that occupied his country that had devastating effects on his family. Not long after the incident of the poulpes, Nemo suddenly changes his behavior toward Aronnax, avoiding him. Aronnax no longer feels the same and begins to sympathize with Ned Land. Near the end of the book, the Nautilus is attacked by a warship of some nation that had made Nemo suffer. Filled with hatred and revenge, Nemo ignores Aronnax's pleas for mercy. Nemo--nicknamed "angel of hatred" by Aronnax--destroys the ship, ramming it just below the waterline, and consequently sinking it into the bottom of the sea, much to Aronnax's horror, as he watches the ship plunge into the abyss. Nemo bows before the pictures of his wife and children and..

Jules Verne's most beloved novels are gathered here in one hardcover volume: three thrilling tales of fabulous journeys under, through, and around the earth. Verne was one of the great pioneers of science fiction. Born in France in 1828, he wrote brilliantly about space, air, and underwater travel long before airplanes and space ships had been invented, and he is still one of the most widely read internationally of all science-fiction writers. But beyond charting new territory for adventurous fiction, his creations have entered our culture and taken on the magnitude and vitality of myth. It is hard to imagine anyone who has not heard of Captain Nemo and his giant submarine exploring the ruins of Atlantis in Twenty Thousand Leagues Under the Sea, Phileas Fogg's frantic race around the world by every means of transportation in Round the World in Eighty Days, and the harrowing descent through a volcanic crater to underground caverns where prehistoric creatures roam in Journey to the Center of the Earth. These stories have seized the imaginations of readers for generations and are as vivid and exciting now as when their author first imagined traveling beyond the bounds of the possible.
