Niki is captured by hostile aliens after Earth is invaded. Once a soldier, she is now a slave. She is sold to the highest bidder, and then lost in a game of cards to a tall Ordanian spaceship captain, who claims to have been sent to rescue her. They work together to survive the dangers of the United

Page 8/81

Universe, while Niki battles her desire for the only man to ever enflame her mind, body and soul. Captain Rhine's mission is to reunite the Earth woman with her family. Outmaneuvering beast shifters and a crazed stalker are the very least he is willing to do to keep her by his side. Her touch ignites his

Page 9/81

passion. Her scent drives his lust. Her strength eases his soul even as she challenges him every step of the way. In the end, Rhine understands, the biggest battle is for her heart. Readers can now get up-to-date private party values, trade-in values, plus retail values on over 10,000

The Viper stunned Americans by showing that Dodge, whose cars were all front-wheel drive (and mostly powered by four-cylinder engines), could make a raw, brutal, V10-powered car that could run with the best. Team

Page 24/81

Viper went a step further at Le Mans, proving that an American car could handle turns, too; so well that it won its class, repeatedly, at a fraction of the cost of the cars it beat. This book covers the transition from a

concept to a rough and brutal rocket to a world-class supercar, and includes every generation. The story also tells of the rough times when the entire Viper business could have been sold to the highest bidder,

Page 26/81

and considers alternative paths the 2013-17 Viper might have taken. This is not just a gushing tribute to the Dodge Viper, the author provides an objective view of the full story, using business, historical,

Page 27/81

and enthusiast perspectives.
The book looks at the
business case for each
generation, the development
stories and their outcomes,
and describes some of the
issues owners may have to
watch out for, particularly

Now in paperback, this book covers Chrysler's incredible series of muscle cars. In 1955 Chrysler introduced the first of its famed 300 "letter series" cars. The company designed a stylish, sporty car, stuffed in one of its potent

Page 30/81

Hemi engines, and gave birth to the American muscle car. The C-300's combination of style and performance put the Mopar brand ahead of its competitors in the postwar performance race. When the Detroit performance wars began in earnest

during the 1960s, Chrysler was well positioned to build the most outrageous, bodacious cars of an outrageous, bodacious era, cars like the famed Charger, Hemi Cuda, Road Runner, Superbird, and Challenger T/A. These cars dominated the dragstrips as well as

the NASCAR ovals, and with color combinations guaranteed to burn out the corneas of your eyes if you stared at them directly, they ruled the streets of America; they ruled not just the streets, but the drive ins and parking lots. Nothing was cooler than Mopar

muscle. Over the years these legendary Mopar muscle cars were the fastest, baddest assed, most outrageous machines to rip up American pavement. "This lavishly produced book is definitely a feast for all fans of this line of cars: the photography (by

Page 34/81

David Newhardt) is absolutely stunning. Not only are the pictures big, and of the highest quality, but the thought that has gone into their composition is plain for all to see. It could be argued that given the striking nature of these cars, and the wonderful

backdrops, it would be hard to go wrong, but Newhardt went the extra mile here, and it shows. The story is also very comprehensive, listing all of the cars from the line, and taking time to tell the story in a well-researched, yet caring way. It is obvious that

Robert Genat knows the subject well and loves it even more. . . . This book is a must-have for all lovers of American muscle, and thanks to the sheer depth of its coverage and drop-dead-gorgeous photography, the asking price of £34.99 is something of a

bargain." - Classic Car Weekly (UK)
This beautifully photographed, all-color development history of Chrysler's Dodge Viper includes the standard Viper, the GTS, and the GTS-R. Complete with factory photos, design prototypes, customs and racing

versions.

On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war

weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and

severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by

protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? Owners of the Map provides answers

Page 53/81

to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers ' everyday lives,

their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis.

Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti

reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, Owners of the Map advances an analysis of power

that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.

In *Comeback*, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White

Page 57/81

take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in

Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors.

Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who

struggled to make the Big Three
change before it was too late.

Uncover the captivating history of the highest-performance cars in America, illustrated with beautiful photography.

Page 67/81

The American muscle car began not in the factories of the big three automakers, but in the garages and dealerships of a hot-rod subculture bent on making the hottest, highest-performance cars on the street. The Complete Book of American Muscle Supercars catalogs these amazing cars, along with the builders who unleashed

Page 68/81

them on the American scene. From Michigan's Royal Pontiac dealership and the souped-up Royal Pontiac Bobcats they built and sold, to the new cars from such fabled names as Carroll Shelby, Mr. Norm's Grand Spaulding Dodge, Nickey Chevrolet, Don Yenke, George Hurst, Baldwin-Motion, Calloway, SLP, and

Page 69/81

Steve Saleen. This gorgeously illustrated book chronicles the outstanding contribution of the tuner / builder to American automotive history through the amazing machines they created. From the oldest of these muscle tuners commanding top dollar at today's classic-car auctions, to the latest vehicles by Ford and Chrysler,

Page 70/81

with their SVT and SRT divisions, this book gives readers a full and fascinating look at American high-performance in its purest form.
