The early Hinckley Triumphs produced from 1991 to 2004 -

Trophy, Daytona, Trident, Trident Sprint, Tiger, Speed Triple,

Adventurer, Thunderbird - were designed and manufactured using a

modular concept. This assists in the sharing of components across

the range of bikes, which was useful with the restricted availability

of spare parts. With over 725 colour photographs, First Generation

Hinckley Triumph (T300) Motorcycles provides helpful guidance

on keeping your bike on the road, including a discussion of the

models produced and their modular design; identifying common

problems and how to address them. There is a comprehensive guide

to maintenance, including the tools required and details of

restoration, modification and upgrades, from changing the exhaust to fabricating swing arms. Also included is a useful list of suppliers for both new and reconditioned parts, as well as specialist service providers.

Rice blast, caused by the fungal pathogen *Magnaporthe grisea*, is one of the most destructive rice diseases worldwide and destroys enough rice to feed more than 60 million people annually. Due to high variability of the fungal population in the field, frequent loss of resistance of newly-released rice cultivars is a major restraint in sustainable rice production. In the last few years, significant progress has been made in understanding the defense mechanism of rice and pathogenicity of the fungus. The rice blast system has become a model pathosystem for understanding the molecular basis of plant-fungal interactions due to the availability of both genomes of rice and *M. grisea* and a large collection of genetic resources. This book provides a complete review of the recent progress and achievements on genetic, genomic and disease control of the disease. Most of the chapters were presented at the 4th International Rice Blast Conference held on October 9-14, 2007 in Changsha, China. This book is a valuable reference not only for plant pathologists and breeders working on rice blast but also for those working on other pathosystems in crop plants.

Life has gotten a bit boring for Zuria Johnston, and with the exception of her Friday nights out with her best, flamboyant friend, Chase, and her job as a guidance counselor, she seems to have hit a rut. After a rough break-up with her longtime boyfriend, Manuel, her prospects of finding a man also seem pretty bleak. That is, until she connects with her poetic crush, Amir, and he opens her eyes to a world of romance and passion that she didn't know existed. She discovers what it feels like to be loved as a real woman should, and to overcome the difficulties of being a young, strong, black woman who is afraid to have her heart broken for a second time. The thrill of new romance seems to fill the emptiness in her life, but her old life isn't as easy to escape as she first thought. Mistakes that she thought she had left behind threaten to undo everything that she has begun to build in this new chapter of her life, but she isn't the only one battling the demons of her past. The poetic and passionate Amir harbors some dark secrets of his own, and when the truth begins to come out, the connection between her two lovers, old and new, may end her short reign of happiness before it ever fully begun. With love from one man and sworn vengeance from another, Zuria is trapped in the middle, trying desperately to make her way through the tangled troubles of family, love, and

happiness. The problem is, she might lose more than the man of her dreams. As this complex and spellbinding story reaches its peak, Zuria will have to risk mind, body, and soul for herself and the people she loves, but will that final risk mean achieving the life she'd always dreamed of? Or will she end up making the ultimate sacrifice?

The Engineering Approach to Winter Sports presents the state-of-the-art research in the field of winter sports in a harmonized and comprehensive way for a diverse audience of engineers, equipment and facilities designers, and materials scientists. The book examines the physics and chemistry of snow and ice with particular focus on the interaction (friction) between sports equipment and snow/ice, how it is influenced by environmental factors, such as temperature and pressure, as well as by contaminants and how it can be modified through the use of ski waxes or the microtextures of blades or ski soles. The authors also cover, in turn, the different disciplines in winter sports: skiing (both alpine and cross country), skating and jumping, bob sledding and skeleton, hockey and curling, with attention given to both equipment design and on the simulation of gesture and track optimization.

The approach of the Beer and Johnston texts has been appreciated by hundreds of thousands of students over decades of engineering education. The Statics and Mechanics of Materials text uses this proven methodology in a new book aimed at programs that teach these two subjects together or as a two-semester sequence. Maintaining the proven methodology and pedagogy of the Beer and Johnston series, Statics and Mechanics of Materials combines the theory and application behind these two subjects into one cohesive text. A wealth of problems, Beer and Johnston's hallmark Sample Problems, and valuable Review and Summary sections at the end of each chapter highlight the key pedagogy of the text.

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers

wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response.
