Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of

underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.

What is Valentine's Day? Antique Valentine's card
Antique Valentine's card
Valentine's Day (or Saint Valentine's Day) is observed on February 14 each year. Today Valentine's Day is celebrated in many countries around the world, mostly in the West, although it remains a working day in all of them. The original "St. Valentine" was just a liturgical celebration of one or more early Christian saint named Valentinus. All the modern romantic connotations were added several centuries later by poets.

What does it mean to bring Asia into conversation with current literature on everyday multiculturalism? This book focuses on the empirical, theoretical and methodological considerations of using an everyday multiculturalism approach to explore the ordinary ways people live together in difference in the Asian region while also drawing attention to increasing trans-Asian mobilities. The chapters in this collection encompass inter-disciplinary research undertaken in Australia, Hong Kong, Malaysia, Singapore and South Korea that explores some core aspects of everyday multiculturalism as it plays out in and across Asia. These include an increase in intraregional movements and especially labour mobility, which demands regard for the experiences of migrants from Burma, China, Nepal, The Philippines and India; negotiations of cultural diversity in nations where a multi-ethnic citizenry is formally recognised through predominantly pluralist models, and/or where national belonging is highly racialized; and

intercultural contestation against, in some cases, the backdrop of a newly emergent multicultural policy environment. The book challenges and reinvigorates discussions around the relative transferability of an everyday multiculturalism framework to Asia, including concepts such as super-diversity, conviviality and everyday racism, and the importance of close attention to how people navigate differences and commonalities in local and trans-local contexts. This book will be of interest to academics and researchers studying migration, multiculturalism, ethnic and racial studies, and to advanced students of Sociology, Political Science and Public Policy. It was originally published as a special issue of Ethnic and Racial Studies.

Alex Thornton has loved only one girl since he was a child. Adriana. However, she married his brother and he ran off to join the Army. Years later, after his brother has died and he has returned, he offers her a place to live with him in a house he's trying to fix up in the back woods of Virginia. The house has a secret though. It turns out that it isn't racoons they have in the attic. Slowly the supernatural activity begins to increase. They hear crying, doors opening and begin to see shadowy people. As he tries to win back the girl he loves, he struggles to keep a hold of his house and his sanity. An abandoned town near the old house holds clues to the cause of the frightening events.

The DARPA Robotics Challenge was a robotics competition that took place in Pomona, California USA in June 2015. The competition was the culmination of 33 months of demanding work by 23 teams and required humanoid robots to perform challenging locomotion and manipulation tasks in a mock disaster site. The challenge was conceived as a response to the Japanese Fukushima nuclear disaster of March 2011. The Fukushima disaster was seen as an ideal candidate for robotic intervention since the risk of exposure to radiation prevented human responders from accessing the site. This volume, edited by Matthew Spenko, Stephen Buerger, and Karl Iagnemma, includes commentary by the organizers, overall analysis of the results, and documentation of the technical efforts of 15 competing teams. The book provides an important record of the successes and failures involved in the DARPA Robotics Challenge and provides guidance for future needs to be addressed by policy makers, funding agencies, and the robotics research community. Many of the papers in this volume were initially published in a series of special issues of the Journal of Field Robotics. We have proudly collected versions of those

papers in this STAR volume.

We create technology enabling us to do things never before possible and it ultimately changes the way we live, work, play, and interact with each other. Throughout human history, the democratization of technology making a technology available to the masses, has brought about sweeping cultural, social, political, and societal changes. In the last half-century, the democratization of computers, information, the Internet, and social media have revolutionized and transformed our lives. We now stand at the beginning of a new era sure to bring about waves of new revolutions, the cognitive systems era. Until now, humans have done all of the thinking. However, our lives are about to be infused with artificial entities capable of performing high-level cognitive processing previously possible only in the human mind. Systems capable of this kind of "synthetic cognition" will achieve and surpass the level of human experts in almost every field of endeavor. Far from replacing humans, these cognitive systems will be our collaborators, teachers, confidants, colleagues, and companions. The future will belong to those who can better partner with these cognitive systems. Made available to the average person via the Internet, handheld devices, and through ordinary objects all around us, expertise will become democratized. Everything will change when anyone has access to expertise in any field and new things will be possible. The democratization of expertise is the foundation on which our society's revolutions will be built over the next half-century. This book discusses societal and cultural revolutions throughout history brought about by the adoption of new technology and gives brief histories of human cognitive augmentation and artificial intelligence. In the coming cognitive systems era, humans, by collaboratively partnering with cognitive systems, will together achieve expert-level performance—synthetic expertise—with humans performing some of the cognitive processing and cognitive systems performing some. As the capabilities of cognitive systems improve over time, the balance of thinking will shift from being mostly human to

mostly artificial. This book introduces the Levels of Cognitive Augmentation to describe this shift. Drawing from previous research in cognitive systems and intelligent agent theory, the knowledge stores required for expertise are identified in a Knowledge Level description of expertise. This book introduces a new abstract level, called the Expertise Level to describe the skills needed for expertise. Combining the knowledge-level and expertise-level descriptions, this book introduces the Model of Expertise. This book demonstrates use of the Model of Expertise by presenting several synthetic expert architectures: a synthetic teacher (Synthia), a synthetic friend/therapist (Sy), a synthetic elderly companion (Lois), a synthetic research companion (Synclair), and an automated scientific hypothesis explorer (Ashe). This book is intended for anyone interested in the fields of cognitive systems, cognitive computing, cognitive augmentation, or artificial intelligence or the impact of technologies from these fields on society. Anyone doing research and development in the area of cognitive systems or artificial intelligence will find this book particularly useful.

"Hold on Kids" is the last book of the trilogy about author Beverley Clarkson's family. The vignettes are events occurring over time - from elementary, junior, senior high school, and college with the author and her brothers. Many of the narratives could easily stand alone, like

short stories. In the author's thinking, that is befitting. The stories are certainly not your everyday, common occurrence in the typical lives of children. Some are quirky, as kids try to make sense of the world, they live in. Others are tragic and left indelible routes in their life's journeys. The author has also included the early years of her marriage, professional life as a teacher and school administrator, and family times with her brothers. The foundations of those experiences were essential to the people they became, casting lifelong nettings of doubt and hope over their lives.

Meet Ezraah King. He's a first responder turned police officer. It was a courageous move being that his father hates cops. He grew up in the civil rights era and is disgusted by his son's choice. Although his friend Ivy Mitchell keeps blasting her shot louder than the Glock she carries on her hip, he doesn't know how many ways he can say he's not interested. His ex, Alysia, crawled into his life like unsuspecting cancer. From day one

she manipulated her way to get close to him. His already paranoid nature was intensified by her deceitful act. He wasn't interested in trying his hand at love until Capria Malone. Capria Malone is just your around the way girl trying her hardest to get up out of Greenspoint so she can live the life she knows she deserves. Her only problem is that she can't shake Pierre-a toxic boyfriend of seven years that's like a noose around her neck. She understands the need to let him go but doesn't want to feel like she wasted seven years of her life for nothing. Hanging on to Pierre is causing her to bleed out. Can Ezra be just the first responder she needs to resuscitate her back to life? Will Ivy just let Ezra pursue the love that he wants, or will she suit up in her riot gear and go to war for what she wants?

This book advances our understanding of the nature, grounds and limits of human dignity

by connecting it with Kant's notion of an ideal moral community, or "Kingdom of Ends". It features original essays by leading Kant scholars and moral and political philosophers from around the world. Although Kant's influential injunction to treat humanity as an end in itself and never merely as a means has garnered the most attention among those interested in analyzing human dignity with a Kantian lens, Kant himself places much more emphasis on the Kingdom of Ends as crucial for defining human dignity. The chapters in this collection focus not only on interpretive issues related to the Kingdom of Ends but also on practical applications that have the potential to advance discussions about the nature and foundations of rights, the content of moral principles, the importance of moral ideals and attitudes and the nature of moral motivation. Exploring and connecting the ideas of human dignity and the Kingdom of Ends significantly deepens our moral understanding, advances discussions in moral and political philosophy and enhances our appreciation of Kant's moral theory. *Human Dignity and the Kingdom of Ends: Kantian Perspectives and Practical Applications* will appeal to scholars and advanced students of Kant, moral philosophy, political philosophy, and political theory. Moving to a new Amish settlement in small-town Colorado was a brave new start for independent-minded quiltmaker Esther Kiem. But helping her reckless relative will really put her special matchmaking skills to the test . . . Mischievous and rebellious, young Ben Kiem is making the wrong kind of name for himself throughout the town of Byler. And

even though his sister-in-law, Esther, somehow coaxes him into keeping company with sensible Linda Eicher, Ben can't see anything they have in common. Or that he could ever be good enough for someone like her. But Linda's down-to-earth nature and unexpected understanding have Ben trying his best to be better, no matter how challenging . . . Linda couldn't be more surprised when Ben turns out to be caring and helpful, despite his rowdy pranks and bad-news friends. And falling in love with him suddenly seems just right. But when a heartbreaking misunderstanding comes between them, both she and Ben must risk enough to trust, stitch the pieces back together—and dare a forever precious happiness. 'Nations under God: The Geopolitics of Faith in the Twenty-First Century' is a timely contribution to the on-going discussion on religion and politics. The volume brings together over thirty leading scholars from a variety of disciplines such as political science, international relations theory, sociology, theology, anthropology, and geography.

Utilising case studies, empirical investigations, and theoretical examinations, this book focuses on the complex roles that religions play in world affairs. It seeks to move beyond the simplistic narratives and overly impassioned polemics which swamp the discourse on the subject in the media, on the internet, and in popular nonfiction, by acting as a vessel for scholarly research on religion. The book presents a balanced analysis of the multifaceted roles taken on by religions, and religious actors, in global politics.

"This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-

now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--
