2013 SYMPOSIUM ON VLSI CIRCUITS

2013 Symposium On Vlsi Circuits

The 2013 Symposia on VLSI Technology and Circuits were held in Kyoto, Japan between 2013-06-11 and 2013-06-14 with more than 1000

microelectronics engineers, managers and researchers attending. IEEE SSCS Magazine provides a summary report

Symposia on VLSI Technology and Circuits - Wikipedia

Advance Program (as of June 6th) You are cordially invited to attend the 2013 Symposium on VLSI Circuits, to be held on June 12-14th, 2013, at the Rihga Royal Hotel Kyoto in Kyoto, Japan. We are repeating last year ' s successful two day overlap with the Symposium on VLSI Technology to foster greater interactions and synergies between these two key conferences.

Welcome to the 2013 Symposium on VLSI Circuits - VLSI 2020

Welcome address from Chair. On behalf of the organizing committee, it is my pleasure to invite you to attend the 2013 Symposium on VLSI Technology and the Short Course, which will be held from June 10th - 13th at Rihga Royal Hotel in Kyoto, Japan. The VLSI Technology Symposium is one of the worldwide premiere technical conferences on semiconductor integrated circuits, offering state-of-the-art semiconductor technology.

2013 VLSI Symposia

2013 SYMPOSIUM ON VLSI CIRCUITS , Kyoto, Japan Tuesday - Friday, June 11 - 14, 2013 (June 11 Short Course, June 12 – 14 Technical Sessions) The 2013 Symposium on VLSI Circuits will provide designers of integrated circuits an opportunity to meet and present important new works on all aspects of VLSI circuits.

The Symposium on VLSI Technology has alternated each year between

sites in US and Japan. In 1987, the first Symposium on VLSI Circuits was held in conjunction with the Technology Symposium in recognition of the growing interest to provide the same small but intense and open forum for discussing circuit and system implementations.

VLSI Symposia | ABOUT

Celebrating its 40th edition in 2020, the VLSI Symposia is the premier international conference on semiconductor technology and circuits. It offers a superb opportunity to interact and synergize on topics spanning the range from new neuromorphic devices, to beyond-the-state-of-the-art process technology to systems-on-chip and AI accelerators.

The SJR is a size-independent prestige indicator that ranks journals by their 'average prestige per article'. It is based on the idea that 'all

citations are not created equal'.

IEEE Symposium on VLSI Circuits, Digest of Technical Papers
Makoto Nagata of Kobe University, Chair of the 2013 Symposium on VLSI Circuits said “ The VLSI Circuits program will present major advancements in the designs with scaled devices at and below 22 nm and also with three dimensional chip stacking with TSVs, as well as more universal topics such as energy-efficient electronics, bio-medical applications, and wire-line/wire-less communications interfaces. ”
