The economy of the Occupied Territories (OT) is currently in turmoil. Income levels have stagnated over the past decade; unemployment and underemployment are rising rapidly; public infrastructure and social services are grossly overstretched; and the fragile natural resource base is threatened with irreversible damage. This study aims to assess prospects for sustainable development in the OT, as well as outline a priority agenda of policy reforms, institutional development and investments needed to promote such growth. The report is in six volumes. Volume I provides a summary overview of the key findings and recommendations of the study. After commenting selectively on the current socioeconomic situation in the OT and its evolution over time, it discusses prospects for sustainable development in the future and outlines the priority agenda of policies and programs needed to promote such development. Volume II explores the strategic choices at the macro level that will be faced by the OT in the future and the implications for economic relations between the OT and the rest of the region. The study looks at the current situation and its evolution over the past 25 years. The study then examines several policy choices for the future affecting the structure of development in the OT. Finally, it outlines some illustrative scenarios for the future, focussing on the consequences of current developments in the region. Volume III reviews the performance of the private sector (including, in particular, the industry and tourism sectors) in the OT. The study assesses the environment in which the private sector operates and its future prospects and makes recommendations for accelerating private sector development in the future. Volume IV reviews the evolution and structure of the agricultural sector in the OT; analyzes its current characteristics; assesses OT competitiveness in the

immediate and longer term; outlines the main policy options and their implications; and provides a preliminary assessment of sectoral financial and technical assistance (TA) needs. Volume V assesses the current situation in the infrastructure sectors (electricity, water supply and sanitation, transport, housing and solid waste services) in the OT; identifies the major issues confronting these sectors; and outlines priorities for TA and investment needs. As local authorities are major institutions in the delivery of public services in these sectors, the study also includes a review of their current situation and makes recommendations for improving the functioning of municipalities. Volume VI reviews the current status as regards human resource development; analyzes options for enhancing individual welfare and labor productivity in the OT; and outlines investment and TA priorities for strengthening existing programs and for laying the foundation for later reforms.

Technical Note on Interconnectedness and Spillover Analysis

F.A. Hayek (1899-1992), the co-leader of the Austrian free market school, embraced the transparently fraudulent assertion made by Donald McCormick, aka Richard Deacon, in *The British Connection* which accused A.C. Pigou, the co-leader of the Cambridge market failure school, of being a Soviet spy. I've been taking care of my little sister for a long time. When Mom was gone, she suddenly became my responsibility. The best years of my life were spent being a caretaker to someone else...with no one to take care of me. So I moved to Paris for my study-abroad program and ended up staying, getting a French Literature degree, studying the classics while sipping the best wine I'd ever had. My sister never makes the best decisions, always makes messes to clean up, and it's finally time for me to have my own life. But when she comes to Paris for a visit...she brings trouble with her. She gets herself into a bad situation, and of course, I come to her rescue...like I always do. Now we're in a labor camp in the middle of nowhere, surrounded by endless snow and mountains, processing drugs for a group of men that never show their faces. There's no chance of escape in this wilderness. Except for my guard. He's not a saint, but he's the only man that's kind to me. He knows I want to escape, but he never reports me. When I've had a hard day, he brings me extra things to make my life easier. He tells me not to run because I'll never make it...but he brings me little hidden tools...as if he's giving me the means. Like he wants me to be free.

This Technical Note discusses findings of interconnectedness and spillover analysis on Italy. The market-based measures of tail risks and interconnectedness among key banks and insurance companies in Italy have declined from their peak but remain at elevated levels. Although the stress on Banca Monte dei Paschi di Siena has been manifesting on its own, the market perception about the condition of the banks appears to be increasingly contaminating the market views on other Italian financial institutions. It is also observed that exogenous factors, such as the Italian sovereign, are the key source of systemic risk for the market pricing of Italian financial institutions.

Synopsis: Web sites are an essential tool that every business must have in today's economy. Only 15 years ago, you could count the number of Web sites in the world with five or six digits; today there are between 15 and 30 billion active Web sites and millions more being added every day. Creating a Web site can be a great way to market a new product, promote your business plan, promote yourself, or simply share a few details about your life with the world. The cost of creating a Web site has risen right alongside the number of Web sites created though and many people are nervous about being able to utilize this revolutionary medium without breaking the bank. This book has been created for just such people, outlining for you in perfect detail everything you need to know to create a traffic attracting Web site, while spending little or no money at all. There are countless resources available, and when you put them all together, they provide a complete toolkit that can make anyone a top notch Web site in no time flat. You will learn how to buy a domain name and host your Web site for less than \$15, with no additional fees charged to your account. You will learn how to use open source software like Wordpress, Joomla, and Mambo to create a platform on which you can build anything you want. You will learn how blogging has made Web site creation easier than ever and how sites like Squidoo, Facebook, and MySpace allow you more freedom to build traffic and draw more attention to what you are advertising at any given time. You will learn how to use common software to edit and tweak your Web sites and how to read the basic code that all Web sites are created in. In addition, an entire chapter is devoted to teaching you how to promote your Web site and draw traffic to it, without spending a dime in the process. You will learn why information is the most valuable asset on the market and how you can become an expert in a niche of your choosing, making money to cover any fees associated with your Web site. With the added resource of hours of interviews with web professionals you will learn which free resources not to use and which ones to outright avoid, as well as how to find and install open source modules and tools to enhance the look and feel of your site. You will learn where you can find copyright-free images to use on your Web sites and how to get free copy that will draw traffic and entertain your visitors. You will learn how to keep a free Web site from falling into the traps the major search engines set to stop spam and ultimately how to leverage new friends, business contacts, and interactions out of your Web site. If you are now, or have ever, considered starting your own Web site before, this book will map the way for you.

She's on the sheriff's most wanted list. Waking up with a naked woman holding a knife at his throat is just about the last thing Sheriff Travis Flynn expected. And the brother she's looking for? From the teachings of the world-renowned Buddhist leader, His Holiness the Dalai Lama, comes a practical, seven-step guidebook for developing your love for others and transforming each and every one of your relationships in life. Widening the Circle of Love offers readers a simple and illuminating programme for transforming self-centred energy into outwardly directed concern. Basing his views on the human capacity to improve, and drawing on exercises and techniques established in India and then refined in Tibetan monasteries over more than a thousand years, the Dalai Lama's teachings are supremely relevant to our lives today: · The First Step: Recognising Friends · The Second Step: Appreciating Kindness · The Third Step: Returning Kindness · The Fourth Step: Learning to Love · The Fifth Step: The Power of Compassion · The Sixth Step: Total Commitment · The Seventh Step: Using the above in the service of others Filled with personal anecdotes from His Holiness's own experiences, as well as centuries-old wisdom, Widening the Circle of Love is a major book which will rival the Dalai Lama's seminal - and bestselling - The Art of Happiness in offering us an accessible, practical path towards personal growth.

For a half century, the experience of Resistance has formed a central reference point within the world of Italian politics and culture. The essays that make up Never Give In offer a critical assessment both of that legacy, and some of the major political forces that have laid claim to it. At the same time, the authors of these essays argue that the Resistance continues as more than simply nostalgia. In each of their historiographical revisions, they also show - even in the much more complicated and less heroic accounts of what happened - a continuing ethic, a way of being and acting politically that is of abiding relevance.
