A perennial bestseller by eminent mathematician G. Polya, *How to Solve It* will show anyone in any field how to think straight. In lucid and appealing prose, Polya reveals how the mathematical method of demonstrating a proof or finding an unknown can be of help in attacking any problem that can be "reasoned" out—from building a bridge to winning a game of anagrams. Generations of readers have relished Polya's deft—indeed, brilliant—instructions on stripping away irrelevancies and going straight to the heart of the problem.

"Siyavush of Our Century" was written by political visionary Mammad Amin Rasulzadeh (1884-1955) who headed the Musavat Party and helped set up the Azerbaijan parliamentary democratic republic in 1918, the first such republic of Turks and Muslims in the eastern world. The turmoil of the times, however, proved too much for Rasulzadeh's young government. On April 25, 1920, Bolshevik troops crossed into Azerbaijan and entered Baku on April 28. They demanded the resignation of Azerbaijan's Parliament and set up their own government. The fledgling democracy, in only its 23rd month, collapsed immediately. Azerbaijan remained under communist rule until the collapse of the Soviet Union in 1991. "Siyavush of Our Century" is a unique work of politics & history, philosophy & literature founded upon the ancient myths and legends of the Turkik peoples. It was written in July 1920 and first published in Istanbul in 1925. It is widely recognised as a classic by the people of Azerbaijan.

A major contribution to Ottoman history, now published in paperback in two volumes.

How to Solve It

The Book of Dede Korkut is a collection of twelve stories set in the heroic age of the Oghuz Turks, a nomadic tribe who had journeyed westwards through Central Asia from the ninth century onwards. The stories are peopled by characters as bizarre as they are unforgettable: Crazy Karchar, whose unpredictability requires an army of fleas to manage it; Kazan, who cheerfully pretends to necrophilia in order to escape from prison; the monster Goggle-eye; and the heroine Chichek, who shoots, races on horseback and wrestles her lover. Geoffrey Lewis's classic translation retains the old and oddly appealing style of the stories, with their mixture of the colloquial, the poetic and the dignified, and magnificently conveys the way in which they bring to life a wild society and its inhabitants. This edition also includes an introduction, a map and explanatory notes.

The original contextualized approach brings grammar to life. Grammar in Context brings grammar alive through engaging and informative readings that are relevant to learners' lives. The book explores a range of conceptual, methodological and empirical issues concerned with the application of needs-based resource allocation in education via formula funding of schools. The first part presents the policy context for needs-based formula funding, the second examines technical matters related to the construction of funding formulae and the third part presents case studies in five countries (Australia, England and Wales, United States and New Zealand). The conclusion offers a 'checklist' for senior decision-makers in Ministries of Education that highlights the pre-conditions for undertaking a successful implementation of needs-based formula funding.

Ali and Nino, two lovers from vastly different backgrounds, grow up together in carefree innocence in Baku on the Caspian Sea. Here, where Eastern and Occidental collide, they are inevitably drawn into the events of the First World War and the Russian Revolution. Torn apart by the turmoil, Ali joins the defense of Azerbaijan from the onslaught of the Red Army, and Nino flees to the safety of Paris with their child, not knowing whether they will ever see each other again. A sweeping tale, as romantic and gripping as *Gone with the Wind* or Dr. Zhivago, it portrays, against a gloriously exotic backdrop, the enduring love between childhood friends divided by their separate cultures.
