Chapter 8 43 Glencoe Algebra 1 8-7 Study Guide and

Intervention Solving $ax^2 + bx + c = 0$ Factor $x^2 + bx + c$

To factor a trinomial of the form $x^2 + bx + c$, find two integers m and p whose product is equal to ac and whose sum is equal to b . If there are no integers that satisfy these requirements, the polynomial is called a prime polynomial.

8-7 Study Guide and Intervention

8-5 Study Guide and Intervention (continued) Using the

Distributive Property Solve Equations by Factoring The

following property, along with factoring, can be used to solve

certain equations. Zero Product Property For any real

numbers a and b , if $ab = 0$, then either $a = 0$, $b = 0$, or both a and b equal 0.
