Recursive Functions 5:03 with Pasan  
Premaratne. In the last video we  
wrote a version of binary search that  
uses a concept called recursion.

Recursion might be a new concept  
for you so let's formalize how we use  
it.

The manipulation of strings is a

In computer science, recursion is a method of solving a problem where the solution depends on solutions to smaller instances of the same problem. Such problems can generally be solved by iteration, but this needs to identify and index the smaller instances at programming time.

Introduction to Recursive Programming provides a detailed and comprehensive introduction to

recursion. This text will serve as a useful guide for anyone who wants to learn how to think and program recursively, by analyzing a wide variety of computational problems of diverse difficulty.

The recursive case will involve  
taking the pigl of (word (bf wd) (first

in pigl1, pigl2, and pigl3. The base  
case will be a word that begins with  
a vowel, for which we'll just add ay  
on the end, as pigl0 does: (define  
(pigl wd) (if (member? (first wd)  
'aeiou) (word wd 'ay) (pigl (word (bf

Recursion (adjective: recursive)

occurs when a thing is defined in terms of itself or of its type.

Recursion is used in a variety of disciplines ranging from linguistics to logic. The most common application of recursion is in mathematics and computer science, where a function being defined is applied within its own definition.

Recursion - Wikipedia

In data structure and algorithms, the concept of Recursion plays an important role. In this article, we will go over a brief introduction to Recursion. Recursion is a technique involving the use of a procedure,

subroutine, function or algorithm that calls itself in a step along with some termination condition.

A set of natural numbers is said to be recursively enumerable if it consists of all  $f(n)$  with  $n \in \mathbb{N}$ , where  $f$  is a primitive recursive function. This notion can easily be extended to subsets of  $\mathbb{N}^k$  and, by a simple trick called

arithmetization, to sets of strings of words in a language.
