Scores of talented
and dedicated people
serve the forensic
science community,
performing vitally
important work.

However, they are

Page 24/109

often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure

Page 25/109

the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening
Forensic Science in
the United States: A

Page 26/109
