Click on the border that surrounds the entire Frames panel to select the frameset. The frameset will be selected in both the Frames panel and in the Document window. You can then easily select a frame by clicking on it in the Frames panel (Figure 27a). Figure 27a Selecting a frame using the Frames panel.

## #27. Formatting Framesets > Adobe Dreamweaver CS4 How-Tos ...

#28. Defining Links Between Frames. Defining links in framesets presents a special challenge. Since technically each frame in a frameset is a different HTML page, you need to click on a link in one page and have the link open in a different HTML page. And you have to "tell" the link what page to open in. Sounds confusing, but I'll walk you through the whole process here.
