Stata????points????,???????

What Stata looks like On LSE computers the Stata package is located on a software server and can be started by either going through the Start menu (Start – Programs – Statistics – Stata11), (Start – All Programs – Specialist and teaching software – Statistics – Stata) or by double clicking on wsestata.exe in the W:\Stata11 folder.

Stata commands referring to 'lcname' } • Stata repeatedly sets lcname equal to each element in list

and executes the commands enclosed in braces. •
lclname is a local macro, so should be enclosed in
single quotes when referred to within the braces. •
listtype may be: local, global, varlist, newlist, numlist.

Introduction to Stata - LSE

If you want to use WinEdt (Version 5) for Stata do-files you need to install the Stata add on. The command highlighting is a little outdated I think, but it works for me. If you want to use Latex and Stata you should also install AutoMode, a tool that switches your configuration automatically from Stata to Latex and back.
