~~Affect Regulation, Mentalization and the Development of ...~~

Affect regulation, or emotion regulation, is the ability of an individual to modulate their emotional state in order to adaptively meet the demands of their environment. Individuals with a broad range of affect regulation strategies will be able to flexibly adapt to a range of stressful situations. Individuals who struggle with emotional regulation may fall back upon a more limited range of stereotyped strategies that are not as successful in meeting their needs, or which come with more ...
