

Age And Generation In Modern Britain

This volume traces the modern critical and performance history of this play, one of Shakespeare's most-loved and most-performed comedies. The essay focus on such modern concerns as feminism, deconstruction, textual theory, and queer theory. Starting with an essay on the Renaissance as the concluding phase of the Middle Ages and ending with appreciations of Paul Oskar Kristeller, the great twentieth-century scholar of the Renaissance, this new volume by John Monfasani brings together seventeen articles that focus both on individuals, such as Erasmus of Rotterdam, Angelo Poliziano, Marsilio Ficino, and Niccolò Perotti, and on large-scale movements, such as the spread of Italian humanism, Ciceronianism, Biblical criticism, and the Plato-Aristotle Controversy. In addition to entering into the persistent debate on the nature of the Renaissance, the articles in the volume also engage what of late have become controversial topics, namely, the shape and significance of Renaissance humanism and the character of the Platonic Academy in Florence.

From John Della Volpe, the director of polling at the Harvard Institute of Politics, *Fight* is an exploration of Gen Z, the issues that matter most to them, and how they will shape the future. 9/11. The war on terror. Hurricane Katrina. The 2008 financial crisis. The housing crisis. The opioid epidemic. Mass school shootings. Global warming. The Trump presidency. COVID-19. Since they were born, Generation Z (also known as "zoomers")—those born from the late 1990s to early 2000s—have been faced with an onslaught of turmoil, destruction and instability unprecedented in modern history. And it shows: they are more stressed, anxious, and depressed than previous generations, a phenomenon John Della Volpe has documented heavily through decades of meeting with groups of young Americans across the country. But Gen Z has not buckled under this tremendous weight. On the contrary, they have organized around issues from gun control to racial and environmental justice to economic equity, becoming more politically engaged than their elders, and showing a unique willingness to disrupt the status quo. In *Fight: How Gen Z Is Channeling Their Passion and Fear to Save America*, Della Volpe draws on his vast experience to show the largest forces shaping zoomers' lives, the issues they care most about, and how they are—despite older Americans' efforts to label Gen Z as overly sensitive, lazy, and entitled—rising to the unprecedented challenges of their time to take control of their country and our future.

The *Cambridge History of the Kurds* is an authoritative and comprehensive volume exploring the social, political and economic features, forces and evolution amongst the Kurds, and in the region known as Kurdistan, from the fifteenth to the twenty-first century. Written in a clear and accessible style by leading scholars in the field, the chapters survey key issues and themes vital to any understanding of the Kurds and Kurdistan including Kurdish language; Kurdish art, culture and literature; Kurdistan in the age of empires; political, social and religious

movements in Kurdistan; and domestic political developments in the twentieth and twenty-first centuries. Other chapters on gender, diaspora, political economy, tribes, cinema and folklore offer fresh perspectives on the Kurds and Kurdistan as well as neatly meeting an exigent need in Middle Eastern studies. Situating contemporary developments taking place in Kurdish-majority regions within broader histories of the region, it forms a definitive survey of the history of the Kurds and Kurdistan.

Presenting a thorough understanding of the many ways in which religion interacts with modernization and its debates, respected scholars such as David Voas, Steve Bruce and Anthony Gill examine modern societies across the world in this splendid book. What was life like on our planet long before the early humans emerged? Paleontologist Dr. Mark P. Witton draws on the latest twenty-first century discoveries to re-create the appearances and lifestyles of extinct, fascinating species, the environments they inhabited, and the challenges they faced living on an ever-changing planet. A worthy successor to Charles Knight's beloved 1946 classic, *Life through the Ages II* takes us on an unforgettable journey through the evolution of life on Earth. Dozens of gorgeous color illustrations and meticulously researched, accompanying commentary showcase the succession of lost worlds, defining events, and ancient creatures that have appeared since the earth was formed, creating an indispensable guide to explore what came before us.

This textbook will familiarize readers with some of the most pressing solidarity and social justice issues in contemporary societies. Ongoing and emerging inequalities along the lines of gender, age, socio-economic status, ethnic background, and sexual orientation challenge the solidarity underlying societies, resulting in complex questions of social justice. Moreover, several global challenges, such as digitalization, climate change, and the COVID-19 pandemic challenge solidarity and social justice in new ways. How do societies respond to these enduring, growing or changing inequalities? Do these challenges lead to an expansion or an erosion of solidarity, in an 'us versus them' rhetoric? And to what extent do societies differ in their social justice values and hence the acceptance of social inequality? Taking a sociological, psychological, and political philosophical approach to these topics, this book offers state-of-the art theoretical and empirical contributions from globally-recognized scholars in sociology, psychology, and political philosophy, providing a unique interdisciplinary approach to understanding solidarity and social justice in response to social inequalities in contemporary European societies.

This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age".

The TPS Frequency Dictionary of Mandarin Chinese is not just another character frequency based dictionary. It has been designed to provide students with a guide for learning new characters, words, and phrases gradually, building upon characters already familiar. The entries have been arranged according to a Triple Progression System in which words are grouped first by character frequency, then by word frequency, and filtered so that new words and phrases appear only after all of their component characters have been introduced.

This book presents significant theoretical and empirical studies of various aspects of hospitality and tourism from the perspectives of both tradition and innovation. With thirty-

nine contributors from Bulgaria, Croatia, Indonesia, Italy, Portugal, Slovenia, Switzerland, Turkey, and the USA, it offers a collection of recent regional and marketing studies. The first part is dedicated to traditional tourism and hospitality issues ranging from tourism policy and planning and management practices, through cultural event marketing to the need for more intercultural communication. Special attention is paid to new developments in specialised types of tourism and specific tourist destinations. The second part of the book deals with new developments in the tourism industry offering a range of chapters on new technologies and techniques, the modern concept of urban and city tourism development and specific new and innovative tourism types and products.

The story of Joseph Gorres's life is in many ways the story of German political culture in the revolutionary epoch. Indeed, his dates, 1776-1848, frame the "Age of Revolution" and, like the age in which he lived, Gorres's life was marked by great upheavals. One of the most prominent German journalists of his age, Gorres pioneered political journalism, or what was called *Publizistik* in Germany. He was a founder of political Catholicism, and was in no small part responsible for the fact that Germany eventually developed a party based on the Catholic confession. Gorres was also an extraordinarily prolific scholar with an almost dizzying range of interests. His life provides a window into an incredibly prolific era in European history, into the political implications of the Enlightenment, the wide-reaching intellectual movement of German romanticism, the roots of German nationalism, and the origins of German political party formation. Gorres traversed the entire political spectrum of his age: his youth, formed in the shadow of the French Revolution, was characterized by enlightened, cosmopolitan republicanism -- what some have dubbed "German Jacobinism"; his middle years included a romantic phase, in which he helped foster a nascent German cultural nationalism, before he became a fiery nationalist writer and publisher of the *Rheinischer Merkur*, the most important political newspaper in Germany up to that time. In the sunset of his life he was primarily a Catholic political polemicist. Gorres helped shape the immensely creative and pivotal years in which he lived, years that saw the development of the modern state system and the origin of the political spectrum in Germany, as well as the very concepts "liberal" and "conservative", which are so much a part of our political discourse today.

Millennials, Baby Boomers, Gen Z—we like to define people by when they were born, but an acclaimed social researcher explains why we shouldn't. Boomers are narcissists. Millennials are spoiled. Gen Zers are lazy. We assume people born around the same time have basically the same values. It makes for good headlines, but is it true? Bobby Duffy has spent years studying generational distinctions. In *The Generation Myth*, he argues that our generational identities are not fixed but fluid, reforming throughout our lives. Based on an analysis of what over three million people really think about homeownership, sex, well-being, and more, Duffy offers a new model for understanding how generations form, how they shape societies, and why generational differences aren't as sharp as we think. *The Generation Myth* is a vital rejoinder to alarmist worries about generational warfare and social decline. The kids are all right, it turns out. Their parents are too.

John Hazlett's engaging study of writers from the 1960s demonstrates the ways in which the idea of the generation has affected autobiographical writing in this century. Autobiographers from the sixties claim to speak on behalf of all members of their generation. However, each writer presents a unique political and personal agenda.

Born roughly between 1964 and 1980, Generation X has received much less critical attention than the two generations that precede and follow it: the Baby Boomers and Millennials. This essay collection examines representations of Generation X in contemporary popular culture, including in television, movies, music, and internet sources. Drawing on generational theory, cultural studies theory, race theory, and feminist theory, the essays in this volume consider the past identities of Generation X, relationships with members of younger generations, modern appropriation of Generation X aesthetics, interactions of Generation X members with family, and the existential values of Generation X.

As seen in *Time*, *USA TODAY*, *The Atlantic*, *The Wall Street Journal*, and on CBS *This Morning*, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first

members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

Tales for an Accelerated Culture

Covering an increasingly important topic in sociology, this book is a thorough and lively introduction to the role and importance of age in contemporary British society. The first two chapters introduce the reader to thinking about age from a sociological perspective. Asking the question 'What is age?' and then guiding the reader through the main theoretical approaches to its sociological study. The core of the book represents the latest information on each of the major age divisions in Britain: childhood; youth; adulthood; later life and old age. The book compares the role of age in Britain today with different cultures and periods in history, as well as assessing the importance and influence of biology, biography, gender, ethnicity, and class. A special feature of the book is the way it pays close attention to the increasingly important notion of 'generation' in explaining British social structure and behaviour. It looks at the way belonging to different 'generations' creates identities and shapes relationships within families and across society. The book will be an invaluable introduction and point of reference for students of sociology, human geography, and social policy, as well as professionals and trainees in the caring professions. The Oxford Modern Britain series comprises authoritative introductory books on all aspects of the social structure of modern Britain. Lively and accessible, the books will be the first point of reference foThey will be invaluable to those taking courses in the Social Sciences. Marriage and Family in Modern China is a groundbreaking psychoanalytic examination of how 70 years of widespread social change have transformed the intimacies of life in modern China. The book describes the evolution of marriage and family structure, from the ancient tradition of large families preferring sons, arranged marriages and devaluation of girls, to a contemporary dominance of free-choice marriages and families that now prefer to remain small even after the ending of the One Child Policy. David Scharff uses extensive reports of his psychoanalytic interventions to demonstrate how the residue of widespread trauma suffered by Chinese families during past centuries has interacted with the effects of rapid modernization to produce new patterns of individual identity, personal ambition and family structure. This wholly original book offers new insight into Chinese families for all those interested in psychoanalytic psychotherapy and in the intricacies of Chinese domestic life.

Reassesses the short life and career of American essayist, critic, and founder of cultural radicalism Bourne (1886-1918), known today mostly for his opposition to US military involvement in Europe and warnings about the military industrial complex. Vaughan (political

science, U. of Minnesota-Duluth) argues that his stance from outside establishment perspectives was not a retreat from politics as many have claimed, but a form of political engagement free from the suppositions that impede genuine debate and democratic change. Twenty-First Century Visions of Prehistory

Shows how Chinese intellectuals with varying politics envisioned the peasantry and its role in changing society during the first half of the twentieth century. Xiaorong Han explores how Chinese intellectuals envisioned the peasantry and its role in changing society during the first half of the twentieth century. Politically motivated intellectuals, both Communist and non-Communist, believed that rural peasants and their villages would be at the heart of change during this long period of national crisis. Nevertheless, intellectuals saw themselves as the true shapers of change who would transform and use the peasantry. Han uses intellectuals' writings to provide a comprehensive look at their views of the peasantry. He shows how intellectuals with varying politics created images of the peasant—a supposed contemporary image and an ideal image of the peasant transformed for political ends, how intellectuals theorized on the nature of Chinese rural life, and how intellectuals conceived their own relationships with peasants. Xiaorong Han is Assistant Professor of History at Butler University.

"Our newest generation, Generation Z, or Zoomers, are coming of age in a world rife with amazing new opportunities and unprecedented challenges. Born around the time the World Wide Web made its public debut in 1995, they are "digital natives," the first generation never to know the world without the Internet. They have grown up alongside powerful global networks that offer endless information and connectivity. They have also had the clear realization that their elders know no better than they do how to navigate ongoing crises; that they and their planet have been badly betrayed by decisions which preceded them. In *Gen Z, Explained*, a team of social scientists set out to take a comprehensive look at this generation, drawing on wide and lively interviews, surveys, and comprehensive linguistic analysis (deploying the authors' proprietary iGen Corpus, a 70-million word collection of Gen-Z-specific English language scraped from social media, time-aligned video transcriptions, and memes). It paints a portrait of an extraordinarily challenged, thoughtful, and promising generation--while sounding a warning to their elders. The authors show that despite all the seemingly insurmountable difficulties they face, this generation continues to be idealistic about the future and highly motivated to make change"--
