Anatomy and Physiology Help: Chapter 4 Tissues

Three serous membranes line the thoracic cavity; the two pleura that cover the lungs and the pericardium that covers the heart. A fourth, the peritoneum, is the serous membrane in the abdominal cavity that covers abdominal organs and forms double sheets of mesenteries that suspend

many of the digestive organs.

4.1 Types of Tissues – Anatomy and Physiology

After studying this chapter, you will be able to: Distinguish between anatomy and physiology, and identify several branches of each; Describe the structure of the body, from simplest to most complex, in terms of the six levels of organization
