## MENTAL HEALTH NP

Describe understanding of the anatomy and physiology of body systems and homeostasis for health. Describe understanding of the biophysical concepts and mechanisms involved in normal activities of living.

Describe understanding of the anatomy and physiology of ...

Anatomy, in layman terms, is the study of the relationship and structure of human body parts. In other words, it gives us a clear picture of each of the different body parts and they relate to other parts.

Physiology, on the other hand, studies the whole body as a unit and the function of each part.

Human anatomy includes both gross anatomy and microscopic anatomy. Gross anatomy includes those human structures that can be seen with the naked eye. Gross anatomy can be compared to the structure of a house as shown in a blueprint of a house or by looking at and inspecting a house in person with the naked eye.
