Animals Animali

Animal, any of a group of multicellular eukaryotic organisms

thought to have evolved independently from the unicellular eukaryotes. Animals differ from other multicellular eukaryotes, the plants and the fungi, in morphology and physiology in that animals evolved muscles, which allow them to be mobile.

animal | Definition, Types, & Facts | Britannica

Animalia definition, the taxonomic kingdom comprising all animals, including humans. See more.

Animalia | Definition of Animalia at Dictionary.com

Animalia definition is - that one of the basic groups of living things that comprises either all the animals or all the multicellular animals.

Animalia | Definition of Animalia by Merriam-Webster

In scientific usage, a multicellular organism that is usually mobile, whose cells are not encased in a rigid cell wall (distinguishing it from plants and fungi) and which derives energy solely from the consumption of other organisms (distinguishing it from plants). A cat is an animal, not a plant. Humans are also animals, under the scientific definition ...

animal - Wiktionary

Animals (also called Metazoa) are multicellular eukaryotic organisms that form the biological kingdom Animalia. With few exceptions, animals consume organic material, breathe oxygen, are able to move, can reproduce sexually, and grow from a hollow sphere of cells, the blastula, during embryonic development. Over 1.5 million living animal species have been described—of which around 1 million ...
