A History of
Architectural
Conservation expands
knowledge about the
conservation of ancient

Page 1/136

monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development of the concepts from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the

Page 2/136

protection and conservation of cultural heritage, and how it has formed the principal concepts and approach to conservation and restoration in today's multi-cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have

Page 3/136

influenced the international conservation movement.

Accessible and of great interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan.

Typically one third of the energy used in many buildings may be consumed by electric

Page 4/136

lighting. Good daylighting design can reduce electricity consumption for lighting and improve standards of visual comfort, health and amenity for the occupants. As the only comprehensive text on the subject written in the last decade, the book will be welcomed by all architects and building services engineers

Page 5/136

interested in good daylighting design. The book is based on the work of 25 experts from all parts of Europe who have collected, evaluated and developed the material under the auspices of the European Commission's Solar Energy and Energy Conservation R&D Programmes.

The volume proposes a

Page 6/136

new model for understanding the end of Augustus' reign and the succession of Tiberius in the years 6 BC to AD 16. Focusing on Drusus Libo's role in an alliance between the enemies of Tiberius, Pettinger offers a comprehensive analysis of the struggle between Tiberius and the supporters of Augustus' grandsons.

GENRE IN A

remarkable variety
of current work. The
twenty-four chapters
in this volume,

reflecting the work
of scholars in
Europe, Australasia,
and North and South
America, were
selected from the
over 400
presentations at
SIGET IV (the

Genre Studies) held

Page 11/136

on the campus of
UNISUL in
Tubarão, Santa

The chapters also
represent a wide
variety of
approaches,
including rhetoric,

Sections are devoted
to theoretical issues,
studies of genres in
the professions,
studies of genre and
media, teaching and
learning genre, and
writing across the

Page 14/136

curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work. For more than a century, scholars have believed that

Page 15/136

Italian humanism
was predominantly
civic in outlook.
Often serving in
communal
government,
fourteenth-century
humanists like
Albertino Mussato
and Coluccio
Salutati are said to
have derived from

Page 16/136

their reading of the Latin classics a rhetoric of republican liberty that was opposed to the 'tyranny' of neighbouring signori and of the German emperors. In this ground-breaking study, Alexander Lee challenges this

Page 17/136

long-held belief.
From the death of
Frederick II in 1250
to the failure of
Rupert of the
Palatinate's ill-fated
expedition in 1402,
Lee argues, the
humanists nurtured a
consistent and
powerful affection
for the Holy Roman

Page 18/136

Empire. Though this was articulated in a variety of different ways, it was nevertheless driven more by political conviction than by cultural concerns. Surrounded by endless conflict - both within and between city-states -

Page 19/136

the humanists
eagerly embraced
the Empire as the
surest guarantee of
peace and liberty,
and lost no
opportunity to
invoke its protection.
Indeed, as Lee
shows, the most
ardent appeals to
imperial authority

Page 20/136

were made not by
'signorial' humanists,
but by humanists in
the service of
communal regimes.
The first
comprehensive,
synoptic study of
humanistic ideas of
Empire in the period
c.1250-1402, this
volume offers a

Page 21/136

radically new
interpretation of
fourteenth-century
political thought,
and raises wide-
ranging questions
about the
foundations of
modern
constitutional ideas.
As such, it is

The Little Theatre

by Konstanty
Ildefons
Galczynski
(1905-53) who was
one of Poland's
most beloved
poets. After World
War II, he began
work as a
playwright,
inventing a colorful

Page 54/136

theatre troupe of performers (animal and human) and contributing a new instalment of The Little Theatre of the Green Goose each week to Przekroj, the Cracow literary magazine.

Intended for

Page 55/136

reading only, The Green Goose went unperformed in Galczynski's life and was finally staged in 1955 and gained a permanent place in the theatre and became a force for the creation of the new Polish drama

that flourished in
the 1960s.

The classic work
on the
evaluation of
city form. What
does the city's
form actually
mean to the
people who live

Page 59/136

there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City,

Page 60/136

formulates a new
criterion—imagea-
bility—and shows
its potential
value as a guide
for the building
and rebuilding
of cities. The
wide scope of
this study leads
to an original
and vital method
for the
evaluation of

Page 61/136

city form. The architect, the planner, and certainly the city dweller will all want to read this book. The final part analyzes the concept of objectivity and estimates both the extent to which the

Page 62/136

inquiries of historians can be said to be objective and the limits of that objectivity in some types of historical accounts.

Page 103/136

Halliwell's
volume offers a
series of
detailed and
challenging
interpretations
of some of the
defining
authors and
texts in the
history of
ancient Greek
poetics: the

Page 104/136

Aristotle's
Poetics,
Gorgias's
Helen,
Isocrates'
treatises,
Philodemus' On

Longinus On the

Page 105/136

Sublime. The volume's fundamental concern is with how the Greeks conceptualized the experience of poetry and debated the values of that experience. The book's organizing

Page 106/136

theme is a
recurrent Greek
dialectic
between ideas
of poetry as,
on the one
hand, a
powerfully
enthraling
experience in
its own right
(a kind of
'ecstasy') and,

Page 107/136

on the other, a medium for the expression of truths which can exercise lasting influence on its audiences' views of the world. Citing a wide range of modern scholarship,

Page 108/136

and making
frequent
connections
with later
periods of
literary theory
and aesthetics,
Halliwell
questions many
orthodoxies and
received
opinions about
the texts

analysed. The
resulting
perspective
casts new light
on ways in
which the
Greeks
attempted to
make sense of
the psychology
of poetic
experience -
including the

Page 110/136

roles of
emotion,
ethics,
imagination,
and knowledge -
in the life of
their culture.

Originally published in Italian in 1978, The Transmission

Page 123/136

of Sin is a study of the origins of the doctrine of original sin, one of the most important teachings of the Catholic Church. While the doctrine has a basis in

Page 124/136

biblical
sources, it
found its
classic
expression in
the work of
St. Augustine.
Yet Augustine
did not work
out his theory
on the basis
of the

Page 125/136

biblical texts
alone, rather
he sought to
understand
them in the
context of the
religious
thinking of
his own time.
Pier Franco
Beatrice's
work seeks to

Page 126/136

illuminate
that context,
and discover
the post-
biblical
influences on
Augustine's
thought.
Although he
made
considerable
efforts to

Page 127/136

defend and elaborate the doctrine of hereditary guilt, says Beatrice, the doctrine already existed before Augustine and was in fact widespread in

Page 128/136

the
Christianity
of the time,
particularly
in the West.
He locates its
origins in
Egypt in the
second half of
the second
century CE, in
Jewish-
