The sex ratio
- the share of
the population
that is female
- varies
across the
world. And
globally in

Page 34/120

2017 the share of women in the world was 49.6%. There are three reasons why the sex ratio of populations varies and is rarely equal: differences in mortality

Page 35/120

rates and life expectancy for women and men. Women, on average, live longer than men. This means that all else being equal, we would expect females to

account for
slightly more
than half of
the total
population.

~~Gender Ratio~~
