This is Volume 2 of a total 2 volumes of this Title. The special focus of this book is to make the ardent readers aware of the salient features of this Vedic text on astrology and how it is distinct from the other transcripts on the subject, available thus far. Great concerted efforts were made to collect, collate and combine all the available manuscripts and other related published material contributed by the eminent contemporary writers and commentators and then the sequence of subject matters is aligned to make it comprehensible and authentic. The name of this holistic text is also as per the ancient statement and record, namely 'Parasara Hora'. This book adduces certain critical and important features which were never attempted before. This book in one hundred chapters falls in line with the description or narration: "???? ?????????? ??? ???? ?????????? verse as appeared in the Uttara Khanda of the text collated by Shridhar. Amongst the other contemporary writers of such treatise, Sitaram Jha, Devchandra Jha, Tarachand Shastri to name a few, have formatted this text covering between 71 and 101 chapters, but in most of the cases 20 odd chapters were not from 'Hora Shastra'. These details are available in the introductory note: 'The specialties of this book'. This note also minutely explains the deletion of inapt Shlokas, the addition of relevant Shlokas and also some Shlokas have been rearranged purposefully so are the chapters. Besides, the treatment of some of the subjects is so unique that will fill the void for the readers to experience. These 20 odd supplementary researched chapters culled out of the published and manuscript materials are unavailable in any text of the Brihat Parasara Hora Shastra (BPHS) of the present time. Trust with this value addition, the esteem readers will get immensely benefited.

Our understanding of Celtic astrology is based mainly on the speculations of modern authors--mostly drawn from classical Greek and Roman writings--and suffers from many misconceptions. European astrology uses the Greek model, containing many Babylonian and Egyptian elements. But Celtic astrology (and other Indo-European astrologies) developed earlier, with relationships to Middle Eastern systems, as well as their own independent forms. This well documented study takes a fresh look at the development of Celtic astrology and the Druids' systems of cosmology, astronomy and astrology. The author analyzes commentaries found in manuscript sources from antiquity to the Middle Ages, comparing them with cosmological and astronomical lore found in Celtic cultures. Ancient constellations, calendars, deities and rituals reveal a rich worldview.
