COUNTERS ON THE ATmega8 - QEEWiki

ATmega8 comes
with two 8-bit
and one 16-bit
timer. This
means that there
are 3 sets of
timers, each

with the ability to count at different rates. The two 8-bit counters can count to 255 whilst the 16-bit counter can count to 65,536.

**AVR 8/16 Bit
Timers/Counters
- Tutorial #11**

Right here, we

implementation)

**AVR atmega8
microcontroller
based projects
list PDF ...**

Say we want to
counter to count
to 1ms, in the
first example we
just lived with
the fact that
our 1ms timer

was actually a
1.024ms timer.
In order to get
a true 1ms we
need to count to
0xF9, which is
only 6 lower
than the max. So
what we need to
do is add 6 to
the register
when it
overflows to 0.
