ATV Basics - Dirt Bikes 101

Youth ATVs for Kids Youth ATVs are for those little riders that have little to no riding experience. They are smaller than other types of ATVs and usually come in engine sizes between 50 cc and 110 cc (in some cases 125 cc). Youth ATVs offer little or no suspension, low power, and either an automatic transmission or no gears at all.

ATVs and UTVs: Everything you need to know | Life Lanes

Riding an ATV is a great experience that can be enjoyed by the entire family. It's exciting, and it teaches respect on many levels, including for the environment, habitat and even respect for others. Learning to ride an ATV can be fun and will make you a safer ATVer.

Guide to Getting Started With Riding ATVs

Learning the Characteristics of an ATV ATVs are motorized vehicles with an overall width of 50 inches or less designed for use exclusively on off-road terrain, primarily for a single rider . They're powered by gasoline engines and equipped with low-pressure tires, handlebars for steering, and a seat that is straddled by the rider.

Learning the Characteristics of an ATV | UT | Offroad Ed.com™

Riding an ATV is a great way to start in powersports and experience the thrill of blazing down a trail or ripping a track while feeling supported on four-wheels.

10 ATV Riding Techniques for Beginners | MotoSport

If you are just getting started in the ATV world, you'd be smart not to buy the biggest machine you see. Here are some of the best ATVs for beginners.

The Best ATVs for Beginners You Will Enjoy for Years - ATV.com

Turning Basics The following basic turning techniques apply to ATVs being ridden at low to moderate speeds: Move your body weight forward and to the inside of the turn. Turn the handlebars while...

Basic ATV Riding Techniques - ATV.com

ATVs normally have a thumb throttle and most have an automatic clutch so the clutch is one less thing to worry about. So go slow and figure out how much "thumb" is too much and get used to the speed and power an ATV delivers before really going for a ride.

5 Mistakes ATV Beginners Make | MotoSport

ATVs uses either disc brakes, drum brakes, or a combination of these two systems. When the rider of an ATV with disc brakes activates the hand lever or foot pedal, brake fluid is being squeezed through the brake lines, activating the brake piston. This, in turn, pushes the brake pad against the brake disk or brake drum, creating friction.

How do ATV brakes work? Learn the basics.
