A radical blueprint for reinventing American higher education. America’s research universities consistently dominate global rankings but may be entrenched in a model that no longer accomplishes their purposes. With their multiple roles of discovery, teaching, and public service, these institutions represent the gold standard in American higher education, but their evolution since the nineteenth century has been only incremental. The need for a new and complementary model that offers broader accessibility to an academic platform underpinned by knowledge production is critical to our well-being and economic competitiveness. Michael M. Crow, president of Arizona State University and an outspoken advocate for reinventing the public research university, conceived the New American University model when he moved from Columbia University to Arizona State in 2002. Following a comprehensive reconceptualization spanning more than a decade, ASU has emerged as an international academic and research powerhouse that serves as the foundational prototype for the new model. Crow has led the transformation of ASU into an egalitarian institution committed to academic excellence, inclusiveness to a broad demographic, and maximum societal impact. In *Designing the New American University*, Crow and coauthor William B. Dabars—a historian whose research focus is the American research university—examine the emergence of this set of institutions and the imperative for the new model, the tenets of which may be adapted by colleges and universities, both public and private. Through institutional innovation, say Crow and Dabars, universities are apt to realize unique and differentiated identities, which maximize their potential to generate the ideas, products, and processes that impact quality of life, standard of living, and national economic competitiveness. *Designing the New American University* will ignite a national discussion about the future evolution of the American research university.

Born to a wealthy family in West Africa around 1770, Omar Ibn Said was abducted and sold into slavery in the United States, where he came to the attention of a prominent North Carolina family after filling “the walls of his room with piteous petitions to be released, all written in the Arabic language,” as one local newspaper reported. Ibn Said soon became a local celebrity, and in 1831 he was asked to write his life story, producing the only known surviving American slave narrative written in Arabic. In *A Muslim American Slave*, scholar and translator Ala Alryyes offers both a definitive translation and an authoritative edition of this singularly important work, lending new insights into the early history of Islam in America and exploring the multiple, shifting interpretations of Ibn Said’s narrative by the nineteenth-century missionaries, ethnographers, and intellectuals who championed it. This edition presents the English translation on pages facing facsimile pages of Ibn Said’s Arabic narrative, augmented by Alryyes’s comprehensive introduction, contextual essays and historical commentary by leading literary critics and scholars of Islam and the African diaspora, photographs, maps, and other writings by Omar Ibn Said. The result is an invaluable addition to our understanding of writings by enslaved Americans and a timely reminder that “Islam” and “America” are not mutually exclusive terms. This edition presents the English translation on pages facing facsimile pages of Ibn Said’s Arabic narrative, augmented by Alryyes’s comprehensive introduction and by photographs, maps, and other writings by Omar Ibn Said. The volume also includes contextual essays and historical commentary by literary critics and scholars of Islam and the African diaspora: Michael A. Gomez, Allan D. Austin, Robert J. Allison, Sylviane A. Diouf, Ghada Osman, and Camille F. Forbes. The result is an invaluable addition to our understanding of writings by enslaved Americans and a timely reminder that “Islam” and “America” are not mutually exclusive terms. A public school principal’s account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms What would happen if a school eliminated the “tracks” that rank students based on their perceived intellectual abilities? Would low-achieving students fall behind and become frustrated? Would their higher-achieving peers suffer from a “watered-down” curriculum? Or is tracking itself the problem? A growing body of research shows that tracking doesn’t increase learning for the minority and low-income students who are overrepresented in low-track classrooms. This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education. As a principal at a New York high school, Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all. She helped lead a bold plan to eliminate tracking from her school, and the results couldn’t have been further from the doom-and-gloom scenarios of tracking proponents. Instead, there was a dramatic improvement in the achievement of all students, across racial and socioeconomic divisions, and a near elimination of the achievement gap. Today, due to those efforts, International Baccalaureate English is the twelfth-grade curriculum for South Side students, and all students take the same challenging courses, together, to prepare them for college. In *On the Same Track*, Burris draws on her own experience, on the experiences of other schools, and on the latest research to make an impassioned case for detracking. Not only does the practice of tracking fail to benefit lower-tracked students, as Burris shows, but it also results in the resegregation of classrooms. Furthermore, she argues that many of today’s popular reforms emanate from the same “sort and select” mentality that reinforces social stratification based on race and class. On the Same Track is a raising, controversial, and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education. Only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential.

“The children and nature movement is fueled by this fundamental idea: the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable.” —Richard Louv, from the new edition In his landmark work *Last Child in the Woods*, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child’s healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children’s lives and the rise in obesity, attention disorders, and depression. Louv’s message has galvanized an international back-to-nature campaign to “Leave No Child Inside.” His book will change the way you think about our future and the future of our children. “[The] national movement to ‘leave no child inside’ . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a ‘green hour’ in each day. . . . The increased activism has been partly inspired by a best-selling book, *Last Child in the Woods*, and its author, Richard Louv.” —The Washington Post “*Last Child in the Woods*, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation.” —The Nation “*’s Health*” “This book is an absolute must-read for parents.” —The Boston Globe Now includes *A Field Guide with 100 Practical Actions We Can Take* Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the U.S. and Abroad

Since its initial publication, *English with an Accent* has provoked debate and controversy within classrooms through its in-depth scrutiny of American attitudes towards language. Rosina Lippi-Green discusses the ways in which discrimination based on accent functions to support and perpetuate social structures and unequal power relations. This second edition has been reorganized and revised to include: new dedicated chapters on Latino English and Asian American English discussion questions, further reading, and suggested classroom exercises, updated examples from the classroom, the judicial system, the media, and corporate culture a discussion of the long-term implications of the Ebonics debate a brand-new companion website with a glossary of key terms and links to audio, video, and images relevant to the each chapter’s content. *English with an Accent* is essential reading for students with interests in attitudes and discrimination towards language.

Literary Nonfiction. Ewa Hryniewicz-Yarbrough arrived in the United States from Poland in 1984, bringing memories of life under a totalitarian regime, where the personal was always political. In essay after essay in *OBJECTS OF AFFECTION*, her remarkable debut, Hryniewicz-Yarbrough shows the immigrant’s double perspective, exploring a “bi-polar” world of displacement and rootlessness, geography and memory, individual and family history, always with an acute awareness of losses and gains that accompany adaptation to a new language and culture and the creation of a new identity.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneraton. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

More than just a statutory compilation, *New York Education Laws* is the best way to keep up-to-date with the broad spectrum of laws impacting education in New York. With commentary on the latest laws by Thomas M. Hamilton, Esq., this volume provides readers with handy summaries of important caselaw, summaries of decisions of the Commissioner of Education, and summaries of new legislation. New York education laws are constantly in flux, and the new edition provides you with an efficient and innovative way to keep abreast of the latest changes. *New York Education Laws* is a compilation of the entire text of Education Law Titles I-VIII extracted from the New York Consolidated Laws, along with many other related statutes that touch on the administration of education in New York. It includes important topics such as school district organization, taxation and financial administration, special schools and instruction, and state and city colleges and institutions. Now, school principals, administrators, educational organizations, attorneys and state officials will have access to all education laws they need in one volume.

A unique modern memoir of growing up in rural China, *Colours of the Mountain* is a powerful and moving story of supreme determination and extraordinary faith against the most impossible odds. Da Chen was born in 1962 in a town over 50 hours’ train journey from Beijing. Persecuted because of his family’s landlord status, Da was an easy target for the farmer-teachers and bullying peasant boys. Whilst his older brother and sisters were forced to work in the fields, Da tired of the chaotic schooling of the Cultural Revolution and found solace with a band of good-time thugs. Following the death of Mao, an academic meritocracy was reintroduced. Da determined to escape Ch’ing Mountain, where he ran around barefoot and there was no electricity and no future. Together with his brother Jin, who had been working the land since boyhood, he began to study day and night. His determination is staggering and inspiring. In 1978, at the age of sixteen, Da Chen took a bus and a train for the first time in his life and travelled to Beijing, to the best English language institute in China. A book about friendships, prejudice, familial love and academic striving, and of one man’s escape from hunger, poverty and ignorance, *Colours of the Mountain* is an inspiring and eloquently recounted memoir.

In this collection of her finest and best-known short essays, Natalia Ginzburg explores both the mundane details and inescapable catastrophes of personal life with the grace and wit that have assured her rightful place in the pantheon of classic mid-century authors. Whether she writes of the loss of a friend, Cesare Pavese; or what is inexpugnable of World War II; or the Abruzzi, where she and her first husband lived in forced residence under Fascist rule; or the importance of silence in our society; or her vocation as a writer; or even a pair of worn-out shoes, Ginzburg brings to her reflections the wisdom of a survivor and the spare, wry, and poetically resonant style her readers have come to recognize. “A glowing light of modern Italian literature . . . Ginzburg’s magic is the utter simplicity of her prose, suddenly illuminated by one word that makes a lightning streak of a plain phrase. . . . As direct and clean as if it were carved in stone, it yet speaks thoughts of the heart.” —The New York Times Book Review

NATIONAL BESTSELLER • Julia’s story of her transformative years in France in her own words is “captivating . . . her marvelously distinctive voice is present on every page.” (San Francisco Chronicle). Although she would later singlehandedly create a new approach to American cuisine with her cookbook *Mastering the Art of French Cooking* and her television show *The French Chef*, Julia Child was not always a master chef. Indeed, when she first arrived in France in 1948 with her husband, Paul, who was to work for the USIS, she spoke no French and knew nothing about the country itself. But as she dove into French culture, buying food at local markets and taking classes at the Cordon Bleu, her life changed forever with her newfound passion for cooking and teaching. Julia’s unforgettable story—struggles with the head of the Cordon Bleu, rejections from publishers to whom she sent her now-famous cookbook, a wonderful, nearly fifty-year long marriage that took the Childs across the globe—unfolds with the spirit so key to Julia’s success as a chef and a writer, brilliantly capturing one of America’s most endearing personalities.

During the 1967 school year, on Wednesday afternoons when all his classmates go to either Catechism or Hebrew school, seventh-grader Holling Hoodhood stays in Mrs. Baker’s classroom where they read the plays of William Shakespeare and Holling learns much of value about the world he lives in.

The author, a victim of birth injuries that left him paralyzed and unable to communicate, presents his autobiography as the story of Joseph Meehan, a disabled student who gains fame as a writer.

#1 NEW YORK TIMES BESTSELLER • “A big sweeping novel of friendship and marriage” (The Washington Post) by the celebrated author of *The Prince of Tides* and *The Great Santini* Leopold Bloom King has been raised in a family shattered—and shadowed—by tragedy. Lonely and adrift, he searches for something to sustain him and finds it among a tightly knit group of outsiders. Surviving marriages happy and troubled, unrequited loves and unspoken longings, hard-won successes and devastating breakdowns, as well as Charleston, South Carolina’s dark legacy of racism and class divisions, these friends will endure until a final test forces them to face something none of them are prepared for. Spanning two turbulent decades, *South of Broad* is Pat Conroy at his finest: a masterpiece from a great American writer whose passion for life and language knows no bounds. Praise for *South of Broad* “Vintage Pat Conroy . . . a big sweeping novel of friendship and marriage.”—The Washington Post “Conroy remains a magician of the page.”—The New York Times Book Review “Richly imagined . . . In this groundbreaking book, Ilham Khuri-Makdisi establishes the existence of a special radical trajectory spanning four continents and linking Beirut, Cairo, and Alexandria between 1860 and 1914. She shows that socialist and anarchist ideas were regularly discussed, disseminated, and reworked among intellectuals, workers, dramatists, Egyptians, Ottoman Syrians, ethnic Italians, Greeks, and many others in these cities. In situating the Middle East within the context of world history, Khuri-Makdisi challenges nationalist and elite narratives of Mediterranean and Middle Eastern history as well as Eurocentric ideas about global radical movements. The book demonstrates that these radical trajectories played a fundamental role in shaping societies throughout the world and offers a powerful rethinking of Ottoman intellectual and social history.

The Cambridge Handbook of English Corpus Linguistics (CHECL) surveys the breadth of corpus-based linguistic research on English, including chapters on collocations, phraseology, grammatical variation, historical change, and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub-discipline, and the inclusion of

empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus-based studies in this area, with discussion of what those studies found, and why they are important. Each chapter also includes a critical discussion of the corpus-based methods employed for research in this area, as well as an explicit summary of new findings and discoveries.

This book provides educators with an accessible guide to best practices concerning content-based instruction (CBI) models and their use in English learner inclusive classrooms. The author effectively bridges the gap between theory and practice with a critical analysis of practical examples and diverse strategies for the inclusion of English learners into K-12 general education courses. The book also raises controversial questions regarding who is qualified to teach English learners and who is responsible for doing so, looking at the difficulties faced by both general educators and ESL teachers in Inclusive Classrooms. By providing a lens through which both ESL teachers and general educators are able to analyze, compare and contrast a range of widely-employed CBI methods, this book allows teachers to make informed decisions in their EL program development and work with English learners in K-12 schools.

#1 NEW YORK TIMES BESTSELLER • The thrilling history of the Targaryens comes to life in this masterly work, the inspiration for HBO's Game of Thrones prequel series House of the Dragon "The thrill of Fire & Blood is the thrill of all Martin's fantasy work: familiar myths debunked, the whole trope table flipped."—Entertainment Weekly Centuries before the events of A Game of Thrones, House Targaryen—the only family of dragonlords to survive the Doom of Valyria—took up residence on Dragonstone. Fire & Blood begins their tale with the legendary Aegon the Conqueror, creator of the Iron Throne, and goes on to recount the generations of Targaryens who fought to hold that iconic seat, all the way up to the civil war that nearly tore their dynasty apart. What really happened during the Dance of the Dragons? Why was it so deadly to visit Valyria after the Doom? What were Maegor the Cruel's worst crimes? What was it like in Westeros when dragons ruled the skies? These are but a few of the questions answered in this essential chronicle, as related by a learned maester of the Citadel. Readers have glimpsed small parts of this narrative in such volumes as The World of Ice & Fire, but now, for the first time, the full tapestry of Targaryen history is revealed. With all the scope and grandeur of Gibbon's The History of the Decline and Fall of the Roman Empire, Fire & Blood is the first volume of the definitive two-part history of the Targaryens, giving readers a whole new appreciation for the dynamic, often bloody, and always fascinating history of Westeros. Praise for Fire & Blood "A masterpiece of popular historical fiction."—The Sunday Times "The saga is a rich and dark one, full of both the title's promised elements. . . . It's hard not to thrill to the descriptions of dragons engaging in airborne combat, or the dilemma of whether defeated rulers should 'bend the knee,' 'take the black' and join the Night's Watch, or simply meet an inventive and horrible end."—The Guardian

Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.
