Good health is something we all aspire to, but it is so much more than just being free of disease. A perfectly functioning body, tranquil mind, and vibrant spirit working together harmoniously create the joy and happiness that put the good in good health and the worth into a life worth living. Our Inner Ocean describes ancient and new holistic modalities of practitioner-applied bodywork and revitalizing self-care practices. These illuminate our human potential and awaken our ability to attain and maintain perfect health and well-being. These modalities act as a springboard from which to dive into our inner ocean—the realm of wisdom within that is entered by making the body, breath, and energy our allies. This mystical space of awareness, intuition, peace, and love can become the resting place of the spirit, subtly working its magic on ourselves and others. Bodywork has long been recognized as a way to help people feel better physically, but the magic of touch can also help us tap in to the wisdom of the body, discover the power of the energy that permeates it, and evoke its innate healing ability. Self-care practices such as yoga, qi gong, breathwork, and meditation help us become our own healers. When we pass through these portals into the inner ocean, we can reduce stress and pain, release blockages, prevent and resolve dysfunctions, and ignite our innate nature. And in doing so, we make the world a better place.

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

Lise Couture has been in the field of Ear Acupuncture for the last twenty-seven years and her work is known in many countries including Canada, France, Argentina, Uruguay, U.S.A. Spain and many others by the token of the conferences she gave at the Lyon Symposium in 1994 and in 2006. She was also a guest speaker at the First Chinese Symposium in Toronto in May of 1986. In 2006, she heard about Dr Ulrich Werth's method with the implants in the ears for treating Parkinsons. It reminded her Dr Paul Nogiwersdorf in one of the Auricular Magazines. One day, while treating a man in his clinic, he related to her that he would have liked to cribble the point with many needles rather than only one: the situation was really chronic and the patient needed help. In her practice she had experienced that feeling and she is amazed that Dr Werth came out with those microimplants inserted in different points of the ear to stop or slow down the destructive process of the Parkinsons. D. Lise is now in her third year of practice and research in the field of Ear Acupuncture and Parkinson. At the same time, she keeps treating her regular patients, but at a lower rhythm. Like Dr Paul Nogier, she is all ears to the stories of her patients. The answer of the healing is in their life experiences. That is her truth and living passion. If she can have you walk, shell do it! D. Lise lives in Ottawa with her son Dannie and husband Michel AndriBeauvois, since 1992.

Learn to treat symptoms of traumatic and acquired brain injury using Chinese medicinal methods of acupuncture and herbal medicine. Covering both Western and Chinese medicine understandings of the brain, the book provides a thorough exploration of treatment options, including multiple acupuncture systems, Chinese herbal formulas, dietary and orthomolecular recommendations, and standard biomedical approaches. Many symptoms associated with brain injury can be effectively addressed or reduced using TCM, including chronic headache, fatigue, dizziness, pain, and anxiety among others. The book highlights the special considerations that should be taken when working with people with brain injury, as well as when treating particular subpopulations, including pediatrics and veterans.

"Fifty-five common pediatric conditions are comprehensively discussed, with diagnostic and evidence-based treatment information, followed by authoritative information on the major CAM therapies available for treatment of the condition. Whenever possible, an integrative approach that combines conventional and alternative approaches is presented."—BOOK JACKET.

In this concise guide to alternative medicine, you will find a wealth of information on questionable practices, some of which are nothing less than the works of darkness. The author sheds light on one dark secret after another. Drawing from years of experience as a medical doctor and as a pastor, Dr. Byler delivers a passionate and compelling examination of practices such as acupuncture, iridology, water witching, applied kinesiology, powwowing and more. Furthermore, he points out the spiritual dangers that accompany them and why we should stay away from such practices.

Ear infections are still the leading reason parents take their child to a doctor. To combat infections, parents and doctors employ arsenals of antihistamines and antibiotics, and too quickly resort to ear tubes and surgery. In this updated and revised second edition of his bestselling Childhood Ear Infections, Dr. Michael Schmidt describes the current controversy in medical journals questioning existing treatments for chronic earaches. The causes of otitis media, Dr. Schmidt argues, are a series of events which flourish when poor nutrition occurs: the immune system is lowered, excess mucus is produced, and vitamin and mineral absorption is inadequate. Careful attention to diet and nutrition to prevent food allergies, and the use of acupressure, homeopathic medicine, and herbal medicine are effective in healing earaches and preventing their recurrence. Healing Childhood Ear Infections offers the most compelling critique to date of existing treatments and the effectiveness of alternative therapies.

SARS is a newly identified human infection caused by a corona virus unlike any other known human or animal virus in its family. The analysis of epidemiological information obtained from the sites of the outbreaks of SARS is still underway but the overall case fatality ratio is known to approach 11% although the rate among the elderly is much higher. Currently the major challenges for the treatment of SARS are: the source of the SARS virus and mode of transmission are still not well understood; there are problems with diagnostic tools; there is no effective treatment; and there is no vaccine for SARS. The above-mentioned difficulties and challenges have motivated national authorities health workers and scientists to explore the potential of complementary treatment. The results of research on integrated treatment with TCM and Western medicine showed that it is safe and that it also has some potential clinical benefits. Therefore the experts suggested that records of such experience could serve as reference material for treatment of SARS in the future. This publication is intended to share experience in the complementary treatment of SARS patients; share the experience of clinical studies in the field of traditional medicine for treatment of SARS between the physicians and researchers; and to further encourage and promote the quality of research in the filed of traditional medicine.

This book addresses wound care in vascular surgery, neurosurgery and lower extremity ulcers, while also providing detailed information on the latest concepts in antimicrobial therapy. The book presents essential content on the assessment, care, measurement and repair of wounds, and describes important scientific aspects as well as current clinical techniques. Due to the various topics covered, the book offers a valuable resource not only for plastic surgeons, but also for neurosurgeons, vascular surgeons and all clinicians who are interested in learning about current antimicrobial agents and their use.

Much-recommended by new mothers, this is the only book you'll need for the best baby advice. Now completely revised and updated. Refreshingly honest, openly frank and candidly blunt, this book has been written by a mother (who is also an experienced midwife) for other mothers. It oozes warm fuzzies, exudes realism in every paragraph and is refreshing in its guiltless honesty. Modern first-time mothers are often alone - devoid of once-traditional motherhood knowledge and practical support. Often previously self-confident women find themselves isolated, fumbling over everyday mothering tasks, enduring sleep deprivation, feeling desperately dependent - and acting and leaking everywhere. This book provides supportive, caring advice - one mum to another - while at the same time serving as an encyclopaedic medical reference regarding the mother and baby. Checked thoroughly by medical professionals, this book is a unique blend, like having access to a kind and gentle GP as well as to all the gems of wisdom of years of mothers' coffee groups. This title clearly and compassionately explains the ups as well as the downs which are perfectly normal aspects of giving birth and mothering in today's society.

The Treatment of Diseases with Acupuncture and Chinese Herbs

A remarkable Pocket Poets anthology of poems from around the world and across the centuries about illness and healing, both physical and spiritual. From ancient Greece and Rome up to the present moment, poets have responded with sensitivity and insight to the troubles of the human body and mind. Poems of Healing gathers a treasury of such poems, tracing the many possible journeys of physical and spiritual illness, injury, and recovery, from John Donne's "Hymne to God My God, In My Sickness" and Emily Dickinson's "The Soul has Bandaged moments" to Eavan Boland's "Anorexic," from W.H. Auden's "Miss Gee" to Lucille Clifton's "Cancer," and from D.H. Lawrence's "The Ship of Death" to Rafael Campo's "Antidote" and Seamus Heaney's "Miracle." Here are poems from around the world, by Sappho, Milton, Baudelaire, Longfellow, Cavafy, and Omar Khayyam; by Stevens, Lowell, and Plath; by Zbigniew Herbert, Louise Bogan, Yehuda Amichai, Mark Strand, and Natalia Toledo. Messages of hope in the midst of pain—in such moving poems as Adam Zagajewski's "Try to Praise the Mutilated World," George Herbert's "The Flower," Wis'awa Szymborska's "The End and the Beginning," Gwendolyn Brooks' "When you have forgotten Sunday: the love story" and Stevie Smith's "Away, Melancholy"—make this a journey of healing. Everyman's Library pursues the highest production standards, printing on acid-free cream-colored paper, with full-cloth cases with two-color foil stamping, decorative endpapers, silk ribbon markers, European-style half-round spines, and a full-color illustrated jacket.

"When you have forgotten Sunday: the love story" and Stevie Smith's "Away, Melancholy"—make this a journey of healing. Everyman's Library pursues the highest production standards, printing on acid-free cream-colored paper, with full-cloth cases with two-color foil stamping, decorative endpapers, silk ribbon markers, European-style half-round spines, and a full-color illustrated jacket. This Auricular Acupuncture provides students and practitioners with a clear, concise, and user-friendly manual on ear acupuncture. It reduces the need for memorization by presenting a method of ear acupuncture that is in keeping with the underpinnings of traditional Chinese medicine. The book can be independently studied and easily used to treat various diseases. It covers ear modalities such as needles, press tacks, seeds and incorporates actual cases from clinical practice to illustrate the clinical applicability of specific modalities and ear acupuncture points. A section on ear diagnosis allows you to supplement your assessment of the pulse, tongue, and hara, thus improving your ability to differentiate the functional basis of imbalance and illness. This edition includes five new chapters on the multiple use of auricular points, prescriptionology practice, common ear questions, new research, and ethical issues. It contains detailed tables and photographs that aid understanding and includes an extensive and updated bibliography. The greatest strength of this book is its user friendliness, which allows both the beginning student and the experienced practitioner to successfully apply auricular medicine in the treatment of their patients in a caring, relatively noninvasive, and effective manner.

Neuropuncture is the clinical manual of a groundbreaking acupuncture system that incorporates neuroscience into its clinical applications for pain management, orthopaedic conditions and internal medicine. It shows acupuncturists how to apply research into the neurophysiological mechanisms of acupuncture and electrical acupuncture to the traditional TCM model of healthcare. The book explains how acupuncture works using Western medical science and illustrates how to apply this knowledge to clinical cases with electrical acupuncture, creating evidence-based acupuncture protocols. These protocols are clinically proven and result in reproducible clinical outcomes.
