We are basically trying to find something that integrates with Inventor. When something changes in Inventor, you just need to open the parts manual and it updates automatically. Also, something that integrates the BOM's so they don't have to retype them or export them out, which also gets updated automatically.

unabridged manual to the Fusion Team. All that proves to me, is that there is a need for such a document. There are manuals present in PDF form but they tend to cover single aspects of Fusion, in combination with the related video. Indeed I've found both the individual manuals and related videos to be of excellent quality. However
