Increasingly, modern medicine relies on so called traditional or ancient medical

Holistic practices

and methods to treat the whole patient. In light of this trend, there is much to be gained from understanding of one of the oldest medical systems still in existence. Tibetan Medicinal Plants provides

Page 18/96

you a detailed analysis of how Tibetan plants are used in this centuries old system. The book opens with a summary of Tibetan medicine and covers the various habitats in which the plants

Page 19/96

are found. The main part of this volume encompasses 60 monographs listed by the Tibetan plant name. Each monograph consists of several chapters addressing different topics

Page 20/96

related either to the Tibetan or the Western approach. Most of the monographs contain a description of the macroscopic and microscopic characteristics of the used plant parts, and

Page 21/96

anatomical features of 76 plants are provided. Each monograph presents an overview of the known chemical constituents and pharmacological properties of each plant and

Page 22/96

describes their use in Tibetan medicine. In contrast to other publications on Tibetan medicine, where translations of the Tibetan terms are given in other languages, this book treats the Tibetan word as a

technical term,
keeps the Tibetan
term and explains
its meaning,
lessening
confusion by
reducing the
number of
translations.

Traditional Tibetan
medicine has been
in existence for

centuries. Curative practices existed in the prebuddistic era, and the art of healing developed more than 2500 years ago. Tibetan Medicinal Plants provides a comprehensive overview of all plant types, thus

Page 25/96

making it easier to grasp the Tibetan concept. It gives you a comprehensive look at this centuries old science.

Iqbal's tragedy
was that after

knowledge contained in this book is invaluable for supporting oneself and others on the journey to wholeness. The educational foundation of the book prepares us to really understand the meaning and use of tongue diagnosis. The ancient art of tongue diagnosis, as this book defines it, is the science of the shape, shadings and

Page 51/96

bams-1st-year-question-paper

markings of the tongue, which describe the current state of an individual's health, as well as their inherited constitution. The potential of tongue diagnosis is that it gives a non-invasive way to measure the tissue integrity of the body, especially the Agni of the digestive system or the Fire or strength of the

digestive system. This can be assessed by simply observing the color and structure of the tongue, then we have a very simple way to take preventive steps to correct those imbalances, and we have a very simple feedback system, meaning the tongue's color, size, shape and shading, to let us know how successful our
