Basics!of!Reverse!Osmosis - Puretec Industrial Water

Basics of Reverse Osmosis Contact Us Puretec Industrial Water provides a complete line of water treatment services and parts across California, Arizona, Nevada, and New Mexico.

Puretec Industrial Water | Reverse Osmosis

Puretec designs and builds Reverse Osmosis systems ranging in size from 1 GPM (1440 GPD) to 500 GPM (720,000 GPD) that can remove up to 99.5% of dissolved salts and virtually all colloidal and suspended matter from the most challenging feed water including municipal, brackish, and sea water applications.

Puretec Industrial Water | Reverse Osmosis Systems

Reverse Osmosis works by using a high pressure pump to increase the pressure on the salt side of the RO and force the water across the semi-permeable RO membrane, leaving almost all (around 95% to 99%) of dissolved salts behind in the reject stream. The amount of pressure required depends on the salt concentration of the feed water.

Puretec Industrial Water | What is Reverse Osmosis?

The latest in Reverse Osmosis, a filtration process for high purity water. The ultra fine membrane operates by rejecting impurities and flushing them out to drain. This system effectively eliminates 98% of all dissolved impurities, heavy metals, salts, viruses, bacteria, cysts, fluoride, nitrate, chlorine, taste, odour, and chemicals.

Puretec RO270 | Reverse Osmosis System

Puretec PRO Series Reverse Osmosis systems are very versatile with the garden tap connection supplied. The systems can be simply transferred for all its different applications. They are highly effective in removal of 98% of suspended particles, sediment, salt, bacteria, chemicals, cysts pesticides, heavy metals, chlorine, taste and odour with optional post filter kit.

Puretec PRO270 Portable Reverse Osmosis Water Treatment System

Basics of Reverse Osmosis. Industrial RO Systems. Puretec Industrial Water builds custom Reverse Osmosis systems designed specifically for your industrial water treatment needs. Puretec designs and builds Industrial Reverse Osmosis systems (RO Systems) ranging in size from 1 GPM (1440 GPD) to 500 GPM (720,000 GPD) that can remove up to 99.5% of ...

Puretec Industrial Water | Industrial RO Systems

Reverse Osmosis Undersink Water Filter System The Puretec Basic RU Series is an economical filter system that easily fits under your existing kitchen bench. It incorporates 5 stages of filtration for super-fine filtration down to .0005 micron*.

RU194-4 Reverse Osmosis Undersink Water Filter ... - Puretec

Welcome to Puretec Water Services. We are a Tempe, Arizona-based service company. We offer installation, service, filters and parts for Reverse Osmosis, Water Softeners and Whole House Filters.

PureTec Water Services – Water Softener and Reverse Osmosis

WHAT IS PURETEC BASIC? A budget-focused range, with the assurance of quality that comes with the Puretec brand. Puretec Basic offers high value at low cost. Providing a range of commonly sought-after filtration solutions, at a price to keep even the most budget-savvy householder satisfied.

Puretec Basic - Manufacturer of Water Filtration Products

The Puretec ROS2700 Series features continuous-flow water production and operates on line pressure, which eliminates the need for an electrical booster pump in most applications. It uses water pressure to reverse a natural physical process called osmosis.

Puretec ROS2700 Continuous Flow RO System

Basics of Reverse Osmosis 5 Salt Rejection % = Conductivity of Feed Water – Conductivity of Permeate Water x 100 Conductivity of Feed The higher the salt rejection, the better the system is performing.

The Puretec Hybrid System is highly effective and efficient in reducing taste, odour, chemicals and sediment in your water, giving good general purpose filtration. Kills 99% of E. Coli, Giardia ...

Puretec Hybrid Water Filter System - New Zealand

Ray from Countryside Ecowater demonstrates with ease how to do a filter change on a basic Reverse Osmosis System.

Basic Reverse Osmosis Filter Change

Providing engineered solutions for all your water treatment needs, including mobile demineralizers, reverse osmosis, portable exchange demineralization, pretreatment systems, cycle chemistry ...

Puretec Industrial Water Service Offering

The reverse osmosis system works on water pressures of 275 kPa minimum to 520 kPa . maximum. Water pressure can be reduced by installing a pressure reducing valve in the water supply pipe to the RO system. A booster pump should be used for low pressure applications. Do not install the reverse osmosis system in extreme hot or cold temperatures.

User Guide - Puretec

The WH2-60 Wholehouse water filter system system is designed for mains water supplies reducing chlorine, taste & odour, chemicals and sediment in your water for the budget-conscious householder, giving good general purpose filtration.Reduces Trihalomethane (THM's).
