

## Beyond Wage Slavery Ken Coates Spokesman

'Another world is possible', the slogan of the World Social Forum, throws into vivid relief the hopes and ideals of a new generation of concerned people. But it also animated and mobilized considerable numbers of people from a previous generation, as this collection of writings demonstrates.

The Republican Transformation of Modern British Politics

Bulletin - Society for the Study of Labour History

An original study of a major change in the political thought of modern Britain, arguing that the period between 1956 and 1968 saw a seminal change in political thinking which created the framework of today's politics. A republican tradition of active citizenship, community and democracy was developed within the New Left and the radical Liberals around Jo Grimond. The Right, whose republican version of a property-owners democracy was developed by Michael Oakeshott and Enoch Powell, completed the new political framework.

The Saskatchewan Labour Report

The Canadian West and the American Northwest offer a valuable setting for considering issues of borders and borderlands. The regions contain certain similarities, and during the first half of the nineteenth century they were even grouped together as a distinct political and economic unit, called the "Oregon Country" by Americans and the "Columbia Department" of the Hudson's Bay Company by the British. The essays in this volume -- which grew out of a conference commemorating the Oregon Treaty of 1846 -- view the boundary between Canada and the United States as a dividing line and also as a regional backbone, with people on each side of the border having key experiences and attitudes in common. In their eloquence and scope, they illustrate how historical study of Canadian-American relations in the West calls into question the parameters of the nation-state. The border has not had a single constant meaning; rather, its significance has changed over time and varied from group to group. The essays in Part One concern the movement of peoples and capital across a relatively permeable boundary during the nineteenth century. Many people in this era--especially Natives, miners, immigrants, and capitalists--did not regard the international boundary as particularly important. Part Two considers how the United States and Canada took pains to strengthen and enforce the international boundary during the twentieth century. In this era, the nation-state became more assertive about defining and defending the borderline. Part Three offers considerations of the distinctions, both real and imagined, that emerged during the nineteenth and twentieth centuries between Canada and the United States. Its essays examine different schools of history, divergent ideas toward wilderness, and the influence of anti-Americanism on Canadians' view of national development in North America.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, Between the World and Me clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.
