From the internationally bestselling author and prizewinning economist—a highly original guide to the global economy. In his bestselling 23 Things They Don't Tell You About Capitalism, Cambridge economist Ha-Joon Chang brilliantly debunked many of the predominant myths of neoclassical economics. Now, in an entertaining and accessible primer, he explains how the global economy actually works—in real-world terms. Writing with irreverent wit, a deep knowledge of history, and a disregard for conventional economic pieties, Chang offers insights that will never be found in the textbooks. Unlike many economists, who present only one view of their discipline, Chang introduces a wide range of economic theories, from classical to Keynesian, revealing how each has its strengths and weaknesses, and why there is no one way to explain economic behavior. Instead, by ignoring the received wisdom and exposing the myriad forces that shape our financial world, Chang gives us the tools we need to understand our increasingly global-and-interconnected world often driven by economics. From the future of the Euro, inequality in China, or the condition of the American manufacturing industry here in the United States—Economics: The User ' s

Guide is a concise and expertly crafted guide to economic fundamentals that offers a clear and accurate picture of the global economy and how and why it affects our daily lives.

Since the internet speeds went above the 500kpbs mark, the number of things people can do with their interconnected devices skyrocketed. Automated homes, connected cars, and internet enabled TVs. The latter is what threatens to revolutionize the entertainment world as we know it, do away with cable TV and abolish the need for expensive blue-ray players. Even though smart TVs are so lucrative, most people find them either too costly, or limiting. The alternative would be going for a TV with an HDMI port, a USB port and purchasing a dongle to bring in the power of internet TV. Chromecast is one of the best and cheapest such tools in the market.
