BS7671 18th Edition Overview of Changes to Wiring Regulations

BS 7671 (big blue book) shows the 100% maximum Zs values. The On Site Guide (little blue book) shows the temperature adjusted Zs values having applied the 0.8 correction factor. The 100% values should be recorded as the maximum permitted Zs value on the electrical test certificate and the temperature adjusted 80% values are used to compare against the actual readings obtained when testing the circuit.

Small Yellow Book - On Site Guide BS7671 Amendment 3:2015

BS 7671 is also used as a national standard by Mauritius, St Lucia, Saint Vincent and the Grenadines, Sierra Leone, Sri Lanka, Trinidad and Tobago, Uganda, Cyprus, and several other countries, which base their wiring regulations on BS 7671.

BS 7671 - Wikipedia

However the figures in the On Site Guide are given as $Z_s(\text{BS7671}) \times 0.8 = Z_s(\text{On Site Guide})$. The true calculation from appendix 3 of BS7671 includes a correction for U_0 taking into account C_{min} . With C_{min} at 0.95, perhaps this would account for the missing 5%? My theory is that the On Site Guide figures have been corrected for 20 °C and not 10 °C, which would bring them in line with Table I1 of the On Site Guide.

The On-Site Guide is an essential guide to BS 7671. It incorporates the extensive changes in BS 7671:2018, making this a vital guide for keeping up to date. It enables the competent electrician to deal with installations (up to 100 A, 3-phase) providing essential information in a convenient, easy-to-use format.
