Then the mouth IS placed over the open end of the bong, and a finger is placed over the carb hole. Smoke IS drawn Into the bong as the contents of the bowl are burned. The smoke IS cooled and filtered as it passes through the water.

Build this bong - SlideShare

Fill the bong with water until it just covers the downstem. Remove the downstem and fill the chamber with water so that all the holes in the downstem are covered. It should be low enough so that it doesn't spill out of the carb, if you have one. Try to get the water between 1" and 1/2" above the end of the downstem.
