A RESEARCH PROJECT & A DOCUMENTARY BOOK ON SCIENCE & WORLD RELIGIONS&COMPARATIVE INTERFAITH DISCUSSIONS(The Qur'an & Modern Science: Compatible or Incompatible?)Ever since the dawn of human life on this planet, Man has always sought to understand Nature, his own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Qur'an, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains Divine guidance for all humankind. Since the message of the Qur'an is believed to be for all times, it should be relevant to every age. Does the Qur'an pass this test? In this booklet, I intend to give an objective analysis of the Muslim belief regarding the Divine origin of the Qur'an, in the light of established scientific discoveries. There was a time, in the history of world civilization, when 'miracles', or what was perceived to be a miracle, took precedence over human reason and logic. But how do we define the term 'miracle'? A miracle is anything that takes place out of the normal course of life and for which mankind has no explanation. However, we must be careful before we accept something as a miracle. An article in 'The Times of India', Mumbai, in 1993 reported that 'a saint' by the name 'Baba Pilot' claimed to have stayed continuously submerged under water in a tank for three consecutive days and nights. However, when reporters wanted to examine the base of the tank of water where he claimed to have performed this 'miraculous' feat, he refused to let them do so. He argued by asking as to how one could examine the womb of a mother that gives birth to a child. The Baba' was hiding something. It as a gimmick simply to gain publicity. THIS BOOK HAS MUCH MORE ADDED INFORMATION ON THE NEW DISCOVERIES OF SCIENTIFIC INFORMATION FOUND IN THE HOLY QURAN & THIS INFORMATION IS ARRANGED AND ORGANIZED BY AUTHOR MR.FAISAL FAHIM. It also informs us of direct and indirect information about known and unknown scientific theories and facts. This book is coming from the world of unseen, beyond the comprehension of our visible world. It is not limited to any time, place, or person; it is for all times. This book is more important to the Creator than heaven and earth. The superiority of this book over all other words and speeches is like Allah's superiority over his creatures. This book also has decades of the history of civilization. This heavenly book contains, in brief, the Scriptures revealed to the previous Messengers in different eras. He argued by asking as to how one could examine the womb of a mother that gives birth to a child. The 'Baba' was hiding something. It as a gimmick simply to gain publicity. Surely, no modern man with even the slightest inkling towards rational thinking would accept such a 'miracle'. If such false miracles are the tests of divinity, then we would have to accept Mr. P.C. Sorcar, the world famous magician known for his ingenious magical tricks and illusions, as the best god-man. A book, claiming Divine origin, is in effect, claiming to be a miracle. Such a claim should be easily verifiable in any age, according to the standards of that age. Muslims believe, that the Qur'an is the last and final revelation of God, the miracle of miracles revealed as a mercy to humankind. This book Quran and Modern Science will investigate the veracity of this belief written by great scholar Dr. Zakir Naik.

This study illustrates why the language of the Qur'an is miraculous, unique, and evidence of divine authority. The author compares the language of the Qur'an with the language of pre-Islamic poetry, the Prophet's words (hadith), and the language of the Arabs both past and present, to demonstrate that although the Qur'an was revealed in Arabic it was at the same time an Arabic which was entirely new. Original and early Muslim audiences viewed this as miraculous and responded to the Qur'an's words, sounds, rhythms, etc. in a manner consistent with a deeper appreciation of its beauty and majesty which modern ears, trained by habit, and despite being surrounded by all manner of dictionaries and studies, are at a loss to capture. The author attempts to remove this veil and present the Qur'an to readers as if hearing it for the first time, to bring to life some of this wonder. In doing so he guides readers to appreciate the beauty of the Qur'an, to become more immersed in it, and to have a clearer understanding of its structure and flow. Devoting special attention to Surah Al Muddaththir, to underpin his analysis, Saeh thus brings the Revelation to life, to demonstrate that each surah has distinct features and characteristics that make it stand out uniquely within the design and sweep of the whole.

Visual Presentation of the Miracle

In this introduction to the Qur'an, Fazlur Rahman unravels its complexities on themes such as God, society, revelation, and prophecy.

Most of us have heard this statement many times 'Quran is a miracle of miracles'. We have heard this many times and we continue to hear this statement often, but the question is that what is it in the Quran that really makes the Quran a miracle? Well to find out more, by mastering the miracles in this book you will master the miracles in the Quran that you may have never heard of. When I found these amazing miracles in the Quran after every miracle that I found I asked myself this question, 'How come I was unaware of this miracle?' 'Why didn't I know about this miracle?' Some miracles amazed me where as some shocked me. I can assure you, once you start reading this book, it will not quench your thirst until you finish reading it and you would feel the same way as what I felt when I got to know about these miracles. This will only increase in knowing your creator, Allah and becoming more obedient to him since this is really the ultimate purpose of our creation.

An examination of the relationship between the Quran and modern science, providing the general reader with an understanding of the creation of the universe from a new perspective. The author discusses the Quran's descriptions of a number of natural phenomena, including complex topics of philosophy and physics, while also examining the Quran's mathematical code described with tables and text.

The Miracle of the Qur'an. The Qur'an is the greatest miracle of God (Allah) and the Qur'an is the proof of the truthfulness of Islam. It is the standing and everlasting miracle, but very rarely, have we heard how is it a miracle? The Qur'an is the ultimate miracle of our Prophet Muhammad (Sallallahuaihi wassalam - S.A.W). It is such a miracle that all the other miracles are considered trivial and inconsequential compared to the Qur'an. This is because the Qur'an is so powerful, so bright and blinding that no matter how bright the other miracles are; when you have the sun, the stars become useless. In this book, Dr. Yasir Qadhi discussed on the miracles of the Qur'an that we either have never acknowledge or we often overlooked. The miracles of the Qur'an are endless and the points are abundance to be mentioned.

The operation of the practical ordinances of the Law in this life and the next 5. Sources of Divine knowledge. "-Publisher's description.

BONUS: This eBook includes downloadable videos and a Q&A with Nabeel Qureshi that are not found in the print edition. Having shared his journey of faith in the New York Times bestselling Seeking Allah, Finding Jesus, Nabeel Qureshi now examines Islam and Christianity in detail, exploring areas of crucial conflict and unpacking the relevant evidence. In this anticipated follow-up book, Nabeel reveals what he discovered in the decade following his conversion, providing a thorough and careful comparison of the evidence for Islam and Christianity--evidence that wrenched his heart and transformed his life. In Seeking Allah, Finding Jesus, Nabeel Qureshi recounted his dramatic journey, describing his departure from Islam and his decision to follow Christ. In the years that followed, he realized that the world's two largest religions are far more different than they initially appeared. No God but One: Allah or Jesus? addresses the most important questions at the interface of Islam and Christianity: How do the two religions differ? Are the differences significant? Can we be confident that either Christianity or Islam is true? And most important, is it worth sacrificing everything for the truth? Nabeel shares stories from his life and ministry, casts new light on current events, and explores pivotal incidents in the histories of both religions, providing a resource that is gripping and thought-provoking, respectful and challenging. Both Islam and Christianity teach that there is No God but One, but who deserves to be worshipped, Allah or Jesus? Calling the Qur'an amazing is not something done only by Muslims, who have an appreciation for the book and who are pleased with it; it has been labelled amazing by non-Muslims as well. In fact, even people who hate Islam very much have still called it amazing.

John L. Esposito is one of America's leading authorities on Islam. Now, in this brilliant portrait of Islam today-- and tomorrow-- he draws on a lifetime of thought and research to provide an accurate, richly nuanced, and revelatory account of the fastest growing religion in the world. Here Esposito explores the major questions and issues that face Islam in the 21st century and that will deeply affect global politics: Is Islam compatible with modern notions of democracy, rule of law, gender equality, and human rights? How representative and widespread is Islamic fundamentalism and the threat of global terrorism? Can Muslim minority communities be loyal citizens in America and Europe? In the midst of these questions Esposito places an important emphasis on the issue of Islamophobia, the threat it poses, and its vast impact on politics and society in the US and Europe. He also turns the mirror on the US and Europe and paints a revealing portrait of how we appear to Muslims. Recent decades have brought extraordinary changes in the Muslim world, and in addressing these issues, Esposito paints a complex picture of Islam in all its diversity--a picture of urgent importance as we face the challenges of the coming century.

In this introduction to the Qur'an, Fazlur Rahman unravels its complexities on themes such as God, society, revelation, and prophecy. "It is an experience I share with most Muslim children. And so it is that our connection to the Qur'an is infused with associations of the warmest and most enduring of human bonds." In Reading the Qur'an, Sardar—one of Europe's leading public intellectuals—laments that for far too many Muslims, the Qur'an he had learned in his mother's lap has become a sick used for ensuring conformity and suppressing dissenting views. Indeed, some find in the Qur'an justification for misogyny, validation for hatred of others, an obsession with dress and mindless rivalry, rules for defining modern states. Arguing passionately but reasonably against these trends, Sardar speaks out for a more open, less doctrinaire approach to reading the Qur'an. He contends that the Qur'an is not fixed in stone for all time, but a dynamic text which every generation must encounter anew, and whose relevance and implications for our time we have yet to fully discover. The words of the Qur'an imply movement: the religious life, it tells us, is not about standing still but always striving to make our life, our society, the entire world around us a better place for everyone. Sardar explores the Qur'an from a variety of perspectives, from traditional exegesis to hermeneutics, critical theory, and cultural analysis, drawing fresh and contemporary lessons from the Sacred Text. He also examines what the Qur'an says about such contemporary topics as power and politics, rights of women, suicide, domestic violence, sex, homosexuality, the veil, freedom of expression, and evolution. Ziauddin Sardar opens a new window on this remarkable Sacred Text, in a book that will engage all devout Muslims and will interest anyone curious about the Qur'an and Islam today.

Al-Quran the Miracle of Miracles. This is a brief book which explains the meanings and the definitions of miracle. It also describes some of the scientific facts mentioned in the Quran which modern scientists, Muslims and non-Muslims alike, affirm as true. A book on religion and science.

PREFACE Fourteen centuries ago, Allah sent down the Qur'an. This book of guidance and wisdom calls man to the truth and instructs all human beings to adhere to the values which this mighty revelation contains. From the day of its revelation to the Day of Judgement, this last divine book will remain as the sole guide for humanity. The book of Allah states, "But it is nothing less than a Reminder to all the worlds." (Qur'an, 68:52) Ever since the Qur'an was revealed, it has possessed an easily understandable language and tone, accessible to all people and in all times. Allah tells us of this style in the Qur'an: "We have made the Qur'an easy to remember..." (Qur'an, 54:22) The perfection of the literary language of the Qur'an, the incomparable features of its style and the superior wisdom contained within it are some of the definitive proofs that it represents the word of our Lord. In addition, the Qur'an contains within its words many miracles which prove it to be Allah's word. One of these attributes is the remarkable number of scientific truths which are contained in the Book of Islam. In this book which was revealed over fourteen centuries ago to the Prophet Muhammad (saas), there are innumerable examples of information humanity have only been able to uncover by the technology of the 20th and 21st centuries.

The Qur'an is the greatest miracle of God (Allah) and the Qur'an is the proof of the truthfulness of Islam. There is no human work in existence that contains statements as far beyond the level of knowledge of its time as the Qur'an. The scientific opinions comparable to those in the Qur'an are the result of modern knowledge. In the commentaries to translations of the Qur'an that have appeared in European languages, I have only been able to find scattered and vague references to them. Nor do commentators writing in Arabic provide a complete study of the aspects of the Qur'an that deal with scientific matters. This is why the idea of a comprehensive study of the problem appealed to me. This is the first book-length presentation of Muhammad Shahru's ideas in English, explaining his ideas on the need for a contemporary re-reading of the Qur'an, a reform of Islamic law and the necessity of freedom of belief in Islam, and other vital issues of Islamic thought and practice.

Engaging, accessible, and thought-provoking. No god but God is a persuasive, elegantly written, and accessible introduction for young readers to a faith that for much of the West remains shrouded in ignorance and fear. Adapted for young readers from No god but God: The Origins, Evolution, and Future of Islam by Reza Aslan, internationally acclaimed scholar of comparative religion, delves into the rituals and traditions of a religion that is largely misunderstood by the West. It covers the religion's origins—the revelation of Muhammad as Prophet and the subsequent uprising against him, and the emergence of his successors—as well as Islam's complex history. No god but God is sure to stimulate discussion and encourage understanding of the Islamic faith and the people who follow it. Praise for No god But God: The Origins, Evolution, and Future of Islam of Islam “This welcome addition to Islamic studies provides a valuable context for reflection about the origins of issues facing Muslims and their neighbors today.”—Publishers Weekly “An introduction to Islam as evocative as it is provocative.”—Kirkus Reviews “Wise and passionate book.”—New York Times Financial Times Best Book of the Year

The Miracle of the Qur'an

The Qur'an & Modern Science

The extraordinary life of a man who founded Islam, and the world he inhabited—and remade. Lesley Hazleton's new book, Agnostic: A Spirited Manifesto, is out now from Riverhead Books. Muhammad's was a life of almost unparalleled historical importance; yet for all the iconic power of his name, the intensely dramatic story of the prophet of Islam is not well known. In The First Muslim, Lesley Hazleton brings him vibrantly to life. Drawing on early eyewitness sources and on history, politics, religion, and psychology, she renders him as a man in full, in all his complexity and vitality. Hazleton's account follows the arc of Muhammad's rise from powerlessness to power, from anonymity to renown, from insignificance to lasting significance. How did a child shunted to the margins end up revolutionizing his world? How did the pariah hounded out of Mecca turn exile into a new and victorious beginning? How did the outsider become the ultimate insider? Impeccably researched and thrillingly readable, Hazleton's narrative captures vivid insight into the man navigating between idealism and pragmatism, faith and politics, nonviolence and violence, rejection and acclaim. The First Muslim illuminates not only an immensely significant figure but his lastingly relevant legacy.

The book provides information on the evidence for the truth of Islam, some benefits of Islam, and general information on Islam.

America's leading religious scholar and public intellectual introduces lay readers to the Qur'an with a measured, powerful reading of the ancient text Garry Wills has spent a lifetime thinking and writing about Christianity. In What the Qur'an Meant, Wills invites readers to join him as he embarks on a timely and necessary reconsideration of the Qur'an, leading us through perplexing passages with insight and erudition. What does the Qur'an actually say about veiling women? Does it justify religious war? There was a time when ordinary Americans did not have to know much about Islam. That is no longer the case. We blundered into the longest war in our history without knowing basic facts about the Islamic civilization with which we were dealing. We are constantly fed false information about Islam—claims that it is essentially a religion of terror. There is no way to assess these claims unless we have at least some knowledge of the Qur'an. In this book Wills, as a non-Muslim with an open mind, reads the Qur'an with sympathy but with rigor, trying to discover why other non-Muslims—such as Pope Francis—find it an inspiring book, worthy to guide people down through the centuries. There are many traditions that add to and distort and blunt the actual words of the text. What Wills does resembles the work of art restorers who clean away accumulated layers of dust to find the original meaning. He compares the Qur'an with other sacred books, the Old Testament and the New Testament, to show many parallels between them. There are also parallel difficulties of interpretation, which call for patient exploration—and which offer some thrills of discovery. What the Qur'an Meant is the opening of a conversation on one of the world's most practiced religions.

This book is dedicated to the subject of the miracles contained in the Quran, also referred to as signs or portents. Each prophet of the three Abrahamic faiths was empowered with signs to facilitate his mission and these are well documented in scriptures. With the passage of time many faded away from memory and many people came to doubt their existence, but not so with the Quran. It remains as pure and eternal as God decreed it to be when it was revealed upon the Prophet Muhammad. The author's intention in this book was to select stories from the Quran, some randomly, that cover a wide range of disciplines such as cosmology, physics, history, embryology and others and present them within the framework of the prevailing knowledge at the time. Discerning readers will hopefully find such presentations not only interesting and easy to follow but also leave no doubt in their minds that the Quran is the Word of God and that it could not have been created by humans. The author's ultimate objective is to link the Islamic faith to the other Abrahamic religions in an effort to convey the message that it is God's intent that we establish peace and justice universally and attain compassion among humankind en toto.

We are all sinners. No human being has ever walked this earth unscathed from sins. But how is a person supposed to enter Jannah if he can't help but commit sins day and night? Are those who enter Jannah human beings who never disobey Allah and have live life untainted by sins? Or is there justification for sinners to attain Allah's blessings in their life? Dr. Yasir Qadhi unravels the very essence of repentance and what does repentance really mean to sinners like us. His explanation touches on the true role of a sinner and what are the steps to repent and thus, to gain Allah's forgiveness.

This book is an exploration of the countless secrets of the universe that God has revealed in Holy Quran more than 1400 years ago. It seeks in a very modest and humble manner to draw you into a journey to uncover some of the awe and splendor of this divine miraculous Scripture. Step in line with the author and walk through the many sacred revelations that have amazingly been encased within the scientific facts, which were yet to be discovered far later in the modern era.

This book highlights the facts that were not known before the turn of the 20th century, and have just started to be understood within the framework of the recently introduced theory of landforms and plate tectonics. These point only to a single aspect of the miraculous nature of the Qur'an, namely its scientific notions. Among an endless list of evidences that go far beyond the scope of this publication, such explicit, precise and comprehensive scientific statements provide an eloquent testimony to the belief that the Qur'an is the Word of the Creator. Hence, it is the basic source of Divine guidance to man, at a time when all previous revelations have either been lost or distorted.

This book contains a summary of The Bible The Quran and Science 2014 of Dr. Maurice Bucaille, the biography of prophet Muhammad (pbuh), an Islamic prayer book according to Quran and Sunnah, and last but not least is that this book also contains "The Qur'an & Modern Science: Compatible or Incompatible?" 2014" by Dr. Zakir Naik and Mr.Faisal Fahim. This is an A to Z book on Islam, Quran, Bible, Torah, Science And it also includes the Islamic prayer book with a biography of the prophet. This book seeks to spiritually unite by highlighting similarities in the texts. It sheds new light and dispels many preconceived ideas in separating what belongs to Revelation from what is the product of error or human interpretation. (The Qur'an & Modern Science: Compatible or Incompatible?)Ever since the dawn of human life on this planet, Man has always sought to understand Nature, his own place in the scheme of creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Qur'an, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains Divine guidance for all humankind. Since the message of the Qur'an is believed to be for all times, it should be relevant to every age. Does the Qur'an pass this test? In this booklet, I intend to give an objective analysis of the Muslim belief regarding the Divine origin of the Qur'an, in the light of established scientific discoveries. There was a time, in the history of world civilization, when 'miracles', or what was perceived to be a miracle, took precedence over human reason and logic. But how do we define the term 'miracle'? A miracle is anything that takes place out of the normal course of life and for which humankind has no explanation. However, we must be careful before we accept something as a miracle. An article in 'The Times of India', Mumbai, in 1993 reported that 'a saint' by the name 'Baba Pilot' claimed to have stayed continuously submerged under water in a tank for three consecutive days and nights. However, when reporters wanted to examine the base of the tank of water where he claimed to have performed this 'miraculous' feat, he refused to let them do so. He argued by asking as to how one could examine the womb of a mother that gives birth to a child. The Baba' was hiding something. It as a gimmick simply to gain publicity. THIS BOOK HAS MUCH MORE ADDED INFORMATION ON THE NEW DISCOVERIES OF SCIENTIFIC INFORMATION FOUND IN THE HOLY QURAN & THIS INFORMATION IS ARRANGED AND ORGANIZED BY FAISAL.Allah (swt) Says: "Invite to the Way of your Lord (i.e. Islam) with wisdom (i.e. with the Divine Revelation and the Quran) and fair preaching, and argue with them in a way that is better.
