Introduction to Veterinary Science, second edition, provides core information for a variety of learners including those studying animal and veterinary sciences as well as students desiring to become veterinary assistants or technicians. The text begins with an overview of cellular and tissue physiology and then follows a systems approach for easy comprehension. It also investigates nutrition, disease, surgeries, and cost analysis of procedures. Both small and large animals are used in examples to provide a real life look at the varied cases encountered in the field. Each chapter begins with a Day in the Life preview that gives practical application to the text's theory, and ends with a description of clinical significance. Introduction to Veterinary Science remains a must have text for animal and veterinary oriented classrooms. Widely acclaimed as the Vietnam War's most highly decorated soldier, Joe Ronnie Hooper in many ways serves

as a symbol for that conflict. His troubled, tempestuous life paralleled the upheavals in American society during the 1960s and 1970s, and his desperate quest to prove his manhood was uncomfortably akin to the macho image projected by three successive presidents in their "tough" policy in Southeast Asia. Looking for a Hero extracts the real Joe Hooper from the welter of lies and myths that swirl around his story; in doing so, the book uncovers not only the complicated truth about an American hero but also the story of how Hooper's war was lost in Vietnam, not at home. Extensive interviews with friends, fellow soldiers, and family members reveal Hooper as a complex, gifted, and disturbed man. They also expose the flaws in his most famous and treasured accomplishment: earning the Medal of Honor. In the distortions, half-truths, and outright lies that mar Hooper's medal of honor file, authors Peter Maslowski and Don Winslow find a painful reflection of the army's inability to be honest with itself and the American public, with all the dire consequences that this dishonesty ultimately entailed. In the inextricably linked stories of Hooper and the Vietnam War, the nature of that deceit, and of America's defeat, becomes clear.

A new approach to actor training by a senior teacher, this illustrated manual shows how to use the body to produce rich, varied and truthful performances. The approach, rooted in the Michael Chekhov Technique, integrates ancient Qigong knowledge with somatic psychology and western actor training methods to identify the links between physical shape, emotion and feeling in performance. Supporting and illustrating the

text, extensive practical exercises developed through actor training classes provide techniques to tune and adapt the body in preparation for creative work. This book will enhance your understanding of the actor's craft, offering the opportunity to grow and advance your pre-existing skills. Warm ups and sequences of exercises will enable you to implement and fully understand this innovative approach. All of the work can be applied to live and screen performances.
