The Section on Business Law of the International Bar Association is greatly indebted to the Editor, J. Michael Robinson and to John Gauntlett, the Chairman of the Committee on Issues and Trading in Securities, and his Vice Chairmen, Blaise Pasztor, Robert Briner and the members of the Committee who have contributed, for their joint efforts in preparing this first book of their committee. It will make a valuable addition to the libraries of all practising lawyers because it has been written by practising lawyers, with the knowledge and experience of their own daily work and the understanding of what a practitioner is looking for. I am confident that this book will prove of real assistance to practitioners world-wide, as have previous publications of other Committees of the Section on Business Law. I wish it great success. I hope that you may wish to join the Section on Business Law and thereby make contact and work with lawyers with similar interests in commercial law. WALTER OPPENHOF Chairman of the Section on Business Law XI Editor's Introduction I have great pleasure in presenting reports from fourteen countries. In the best tradition of many institutions of higher learning which trace their origins to some medieval ale house, this project has its genesis in a bar.

'Regulation ensures, among other things, public health and safety. However, the duplication and lack of harmonization of regulations across and among jurisdictions can create a significant burden and generate important costs for Canadian businesses. There are hundreds of federal laws and regulatory requirements, in addition to an unknown number of regulatory requirements imposed by provincial, territorial and municipal governments. This burden can be greater for small businesses, given their fewer resources. The lack of harmonization can hinder market access for Canadian companies by slowing down some approval processes, increasing costs and creating barriers to trade within Canada and internationally. Ultimately, the regulatory burden can hinder competitiveness and innovation opportunities'--Summary, page [1].  
This new edition of Kevin McGuinness's widely cited treatise on corporate law covers the wealth of case law and legislative changes since 1999. Discover how major corporate scandals and amendments to the Canadian Business Corporations Act and Ontario Business Corporations Act have impacted the way your clients operate-and what your new responsibilities involve. Canadian Business Corporations Law, formerly known as The Law and Practice of Canadian Business Corporations, combines all commentary and analysis into a convenient, user-friendly volume that you can easily bring to court or the boardroom.  
Ffrench's book offers a way out of the pervasive confusion that has frustrated efforts of companies attempting to deal with foreign regulatory practices. Designed as a practical, comprehensive guide, it is the only work to present securities law and regulation for all of North, Central, and South America. In addition it provides details concerning various nations' business organizations, regulatory institutions, anti-trust laws, foreign investment laws, laws of insider trading, and labor laws. The author includes complete coverage of the intricate statutory regulations and case law of the United States and Canada, and he advances reform proposals that would simplify take-over and merger regulation in these and other countries.

This report seeks to do two things. First, it examines some aspects of U.S. laws which may discourage U.S. firms from doing business in Canada the way Canadians would like them to. Second, it attempts to describe the U.S. policy purposes and the bases of Canadian resentment in two of the more significant fields of legal conflict: antitrust and cold war trade controls.
