This guidance covers the practical application of photogrammetry in recording cultural heritage, with particular reference to structure from motion (SfM) techniques. Our audience for this document

*Page 62/150*

*canon-50d-service-manual*

includes survey contractors, archaeological contractors, voluntary organisations and specialists. Photogrammetric image acquisition and processing, until recently requiring a considerable investment in hardware and software, are now

*Page 63/150*

*canon-50d-service-manual*

possible at a fraction of their former cost. This has led to a huge increase in the use of photogrammetry in cultural heritage recording. The skills required to apply the techniques successfully and accurately are discussed, and background

*Page 64/150*

*canon-50d-service-manual*

information on how various parts of the process work is provided so that better results can be achieved through better understanding.

Photogrammetry is characterised by its versatility, and is applicable over a wide range of scales, from landscapes to small objects. The

*Page 65/150*

*canon-50d-service-manual*

particular requirements needed at these different scales are outlined, and both imaging techniques and useful ancillary equipment are described. The different types of outputs are discussed, including their suitability for further interrogation using a range of

*Page 66/150*

established analytical techniques and the presentation options available. A range of case studies illustrates the application of photogrammetry across a variety of projects that broadly reflect the areas discussed in the text. This document is one of a number of

This manual is intended to fill a gap in the area of Romance studies. There is no introduction available so far that broadly

*Page 100/150*

*canon-50d-service-manual*

covers the field of Catalan linguistics, neither in Catalan nor in any other language. The work deals with the language spoken in Catalonia and Andorra, the Balearic Islands, the region of Valencia, Northern Catalonia and

*Page 101/150*

the town of l'Alguer in Sardinia. Besides introducing the ideologies of language and nation and the history of Catalan linguistics, the manual is divided into separate parts embracing the description – grammar,

*Page 102/150*

lexicon, variation and varieties – and the history of the language since the early medieval period to the present day. It also covers its current social and political situation in the new local and global contexts. The main

*Page 103/150*

*canon-50d-service-manual*

emphasis is placed on modern Catalan. The manual is designed as a companion for students of Catalan, while also introducing specialists of other languages into this field, in particular scholars of Romance languages.
