She operates on the other side of the law. Once she finds her brother-alive-she'll get out of the pack's territory and go back to her regular, normal, non-furry life of changing jobs and her name whenever her past closes in. Everything changes, however, when he arrives at Olivia's villa. Instead of the middle-aged woman he expects, Andrew finds a vivacious young beauty who piques his interest...and his lust. But while Andrew may be taken aback by the contessa, Olivia knows exactly who Andrew is...and that he is dangerous. She may let him claim her body, but can she trust him with her secrets?

A Hands-on Guide to Harnessing the Wind

Western Union and the Creation of the American Corporate Order, 1845-1893

Horizons in Neuropsychopharmacology

This work chronicles the rise of Western Union Telegraph from its origins in the helter-skelter ferment of antebellum capitalism to its apogee as the first corporation to monopolize an industry on a national scale. The battles that raged over Western Union's monopoly on nineteenth-century American telecommunications - in Congress, in courts, and in the press - illuminate the fierce tensions over the rising power of corporations after the Civil War and the reshaping of American political economy. The telegraph debate reveals that what we understand as the normative relationship between private capital and public interest is the product of a historical process that was neither inevitable nor uncontested. Western Union's monopoly was not the result of market logic or a managerial revolution, but the conscious creation of entrepreneurs protecting their investments. In the process, these entrepreneurs elevated economic liberalism above traditional republican principles of public interest and helped create a new corporate order.

Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art--particularly multimedia installations that take place in and on the surfaces of buildings--and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.
