~~Capital Budgeting and Cost Analysis (Chapter 6)~~ Part 1 Capital Budgeting And Long Term

Capital budgeting is the process of determining which long-term capital investments a company will make in order to profit in the long-term. Capital budgeting requires detailed financial analysis, including estimating the rate of return for a capital project.

Capital Budgeting: What Is It?

Looking at the return on investment that the increased capacity yields, capital budgeting calculates the long-term cost of the machine. This also factors in maintenance, depreciation and other hidden costs that normal budgets would ignore. The end result is a picture of how much initial investment is needed, and if that investment will be worth your time in terms of lifespan value it will provide. How Do I Make a Capital Budget?
