Troubleshooting and
Repair of Diesel Engines
The Commercial Motor
After 1945 many
countries needed new
vehicles in order to
replace those that had
been destroyed or
worn out in the war

Page 32/39

caterpillar-3406-engine-weight

and so British factories were offered incentives to produce and export lorries. Foden were one such company to take advantage of the opportunities available and in the 1950s, had agents in almost every West European country. In

Page 33/39

caterpillar-3406-engine-weight

the 1970s when the European market had declined, the Middle East, Australia and South Africa markets rose to prominence and from the 1980s onwards, New Zealand became the primary destination for the marque. By the time production

Page 34/39

caterpillar-3406-engine-weight

finally ceased in 2006,
they had sold vehicles
all over the world.

The vehicles
produced for export
differed greatly from
the designs used in
Britain. In many
countries the gross
weights of vehicles
exceeded the British
values significantly, so

Page 35/39

caterpillar-3406-engine-weight

the majority of Foden export vehicles had much stronger chassis, gearboxes, axles, suspensions and more powerful engines than their British counterparts. Many also had tropical double roofs to keep the heat out and sleeper cabs, long

Page 36/39

caterpillar-3406-engine-weight

before they became common in the UK. This comprehensive book detailing the lorries that Foden exported around the world, follows on from the publication of the author's first book about the Fodens produced and used

Page 37/39

caterpillar-3406-engine-weight

within the UK (Foden Special Vehicles). It includes 364 fascinating photographs, many of which have never been previously published and will be of interest to all Foden fans and transport enthusiasts in general.
