**Dr. Bruce
Alberts speaks on Cell**

Biology *Cell And Molecular
Biology By*

Cell and Molecular Biology
studies the structure and
function of the cell, which
is the basic unit of life.
Cell biology is concerned
with the physiological
properties, metabolic
processes, signaling
pathways, life cycle,
chemical composition and
interactions of the cell
with their environment. This
is done both on a

microscopic and molecular level as it encompasses prokaryotic cells and eukaryotic cells.
