Cessna T303 Crusader - Wikipedia

support.cessna.com

I last flew the Cessna T303 Crusader about 20 yrs ago, and I didn't do much time in it so excuse any mistakes in my ramblings. IIRC the T303 was introduced in the '80s to replace the 310 with an easy entry cabin and the new wing planform that was being used on the 404, 421, and 402C. The engines were TSIO-520's of about 250hp (IIRC).

The Cessna T303 Crusader was the last piston twin designed by
Cessna and, in some ways, the most advanced. It was originally
designed to compete as a low powered trainer but market
economics changed in the late 70's, and it emerged as a cabin-class
twin that would replace the 310 and compete with Navajos, Senecas
and Barons.

The Cessna T303 Crusader is an American six-place light twin-engined aircraft built by Cessna Aircraft Company. The new model, designated the T303 Crusader first flew on October 17, 1979 with the first deliveries being made in October, 1981. The T303 is an all-metal low-wing six-seat twin-engined aircraft with a retractable tricycle undercarriage.

Cessna Flyer Association - Cessna T303 Crusader

This is the VirtualCol version of the Cessna T303 Crusader twin airplane. Â It is reasonably well modelled with clean lines and you get 3 repaints in the package (plus a repaint package). Â In general the instrumentation is reasonably good, nice and clear and functional, as are the default Baron sounds (internal and external), and it flies extremely well.
