

Ceviri Eleştirisi Kurami Muharrem Tosun

Exploring Translation Theories presents a comprehensive analysis of the core contemporary paradigms of Western translation theory. The book covers theories of equivalence, purpose, description, uncertainty, localization, and cultural translation. This second edition adds coverage on new translation technologies, volunteer translators, non-linear logic, mediation, Asian languages, and research on translators' cognitive processes. Readers are encouraged to explore the various theories and consider their strengths, weaknesses, and implications for translation practice. The book concludes with a survey of the way translation is used as a model in postmodern cultural studies and sociologies, extending its scope beyond traditional Western notions. Features in each chapter include: An introduction outlining the main points, key concepts and illustrative examples. Examples drawn from a range of languages, although knowledge of no language other than English is assumed. Discussion points and suggested classroom activities. A chapter summary. This comprehensive and engaging book is ideal both for self-study and as a textbook for Translation theory courses within Translation Studies, Comparative Literature and Applied Linguistics. At his wit's end with his son's grief over the death of his mother a year earlier, Sheppard invites a troubled youth, Rufus, into their home. Contemptuous of Sheppard, Rufus resists the man's attempts to improve him, but the extent—and consequences—of Rufus's disdain for Sheppard become clear only in Rufus's dealings with Sheppard's son, Norton. American author Flannery O'Connor is known for her portrayal of flawed characters and their inevitable spiritual transformation. "The Lame Shall Enter First" is a haunting story of a flawed man unable to connect with and comfort his grieving son. HarperPerennial Classics brings great works of literature to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Look for more titles in the HarperPerennial Classics collection to build your digital library. Eduard's Homecoming

This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: • Polyfunctional versus monofunctional dictionary tools • Developing theories of lexicography for electronic mediums • Distinguishing between the database and the dictionary • Online dictionaries not as data repositories but as sophisticated search engines This volume will appeal to scholars in lexicography and to practicing lexicographers.

This is a study of the relationship between translation, culture and counterculture, presenting a political and ideological vision of translating. Offering an approach to the cultural turn in Translation Studies at the end of the century, the book endeavours to explore the closer links between cultural studies and translation. It presents the arguments of several scholars on the most innovative ways of understanding translation, in order to clarify the role and function of translations and translators in culture and society.

This book breaks new ground in translation theory and practice. The central question is: In what ways are translations affected by text types? The two main areas of investigation are: A. What are the advantages of focusing on text types when trying to understand the process of translation? How do translators tackle different text types in their daily practice? B. To what extent and in what areas are text types identical across languages and cultures? What similarities and dissimilarities can be observed in text types of original and translated texts?Part I deals with methodological aspects and offers a typology of translations both as product and as process. Part II is devoted to domain-specific texts in a cross-cultural perspective, while Part III is concerned with terminology and lexicon as well as the constraints of mode and medium involving dubbing and subtitling as translation methods. Sonnets, sagas, fairy tales, novels and feature films, sermons, political speeches, international treaties, instruction leaflets, business letters, academic lectures, academic articles, medical research articles, technical brochures and legal documents are but some of the texts under investigation. In sum, this volume provides a theoretical overview of major problems and possibilities as well as investigations into a variety of text types with practical suggestions that deserve to be weighted by anyone considering the relation between text typology and translation. The volume is indispensable for the translator in his/her efforts to become a "competent text-aware professional".

Ahmet Midhat Efendi's famous 1875 novel Felâtn Bey and Râkim Efendi takes place in late nineteenth-century Istanbul and follows the lives of two young men who come from radically different backgrounds. Râkim Efendi is an erudite, self-made man, one who is ambitious and cultivated enough to mingle with a European crowd. In contrast, Felâtn Bey is a spendthrift who lacks intellectual curiosity and a strong work ethic. Squandering his wealth and education, he leads a life of decadence. The novel traces Râkim and Felâtn's relationships with multiple characters, charting their romances and passions, as well as their foibles and amusing mishaps as they struggle to find and follow their own path through the many temptations and traps of European culture. The author creates a rich portrait of stratified Ottoman life through a diverse and colorful cast of characters—from a French piano teacher and an Arab nanny, to a Circassian slave girl—each deftly navigating the shifting mores of their social class. Written during the Ottoman Empire's uneasy transition to modernity, the novel's protagonists embody both the best and worst elements of two worlds, European and Ottoman. The novel provides readers with an elegant yet powerful appeal for progressive reforms and individual freedoms. Levi and Ringer's fluid translation of this Ottoman classic stands as a landmark in the history of Turkish literature in translation.

The Devourers

In most subtitling countries, those lines at the bottom of the screen are the most read medium of all, for which reason they deserve all the academic attention they can get. This monograph represents a large-scale attempt to provide such attention, by exploring the norms of subtitling for television. It does so by empirically investigating a large corpus of television subtitles from Scandinavia, one of the bastions of subtitling, along with other European data. The aim of the book is twofold: first, to provide an advanced and comprehensive model for investigating translation problems in the form of Extralinguistic Cultural References (ECRs). Second, to empirically explore current European television subtitling norms, and to look into future developments in this area. This book will be of interest to anyone interested in gaining access to state-of-the-art tools for translation analysis, or in learning more about the norms of subtitling, based on empirically reliable and current material.

An updated, repackaged edition of the bestselling divination tool and party favorite - ask a yes or no question, open the book, find your answer - with more than a million copies in print. Should you ask your boss for a raise? Call that cutie you met at a party? Sell your Google stock? Tell your best friend her boyfriend's cheating? The answer to these questions (and hundreds of others) is in this fun and weirdly wise little book that's simple to put down. It's simple to use: just hold it closed in your hands and concentrate on your question for a few seconds. While visualizing or speaking your question, place one palm down on the book's front and stroke the edge of the pages back to front. When you sense the time is right, open to the page your fingers landed on and there is your answer! Fun, satisfying, and a lot less time-consuming than asking everyone you know for advice. Over 1 million copies in print!

Übersetzen ist in einem fundamentalen Sinne hermeneutisch: Jede Übersetzung ist das Ergebnis eines jeweils anderen Verstehens und Auslegens des Originals durch den Übersetzer. Das vorliegende Buch beschä ftigt sich mit dieser Grundkenntnis der Übersetzungspraxis und reflektiert sie auf ü bersetzungstheoretischer Ebene. So wird anschaulich gezeigt, wie die unumg ä ngliche human-, d.h. ü bersetzungsbedingte Dimension des Übersetzungsprozesses mit den wissenschaftlichen Anforderungen der Übersetzungsforschung vereinbart werden kann. Das Buch pl ä diert f ü r eine konstruktive Artikulation der hermeneutischen Tradition und der neuen Übersetzungstheorie in einer interdisziplin ä ren Perspektive und zeigt Wege zur Konstitution einer Übersetzungswissenschaft auf hermeneutischer Basis auf.

This book deals with one of the most prominent and promising developments in modern Translation Studies--the sociology of translation. Tyulenen develops an original way of applying Luhmann's Social Systems Theory to translation, viewing translation as a social-systemic boundary phenomenon. The book consists of two major parts: in the first, translation is described as a system in its own right with its systemic properties; in the second part, translation is viewed as a social subsystem and as a boundary phenomenon in the overall social system.

Übersetzungen spielten bei dem Verwestlichungs- und Modernisierungsprozess der Türkischen Republik im 20. Jahrhundert eine wichtige Rolle. Sie dienten nicht nur der Verbreitung der Ideen des Westens, sondern auch der Gestaltung von literarischen und wissenschaftlichen Ideen. Obwohl die ÜbersetzerInnen sehr stark bei der Ausformung der türkischen Literatur mitgewirkt haben, sind sie kaum bekannt. Wer aber waren diese "unbekannten HeldInnen"? Ausgehend von den grundlegenden Informationen des türkischen Übersetzerlexikons, welches nach dem Muster des schwedischen Übersetzerlexikons Svenskt Översättarlexikon und des Germersheimer Übersetzerlexikons angelegt wurde, werden elf ÜbersetzerInnen vorgestellt, die ins Türkische oder aus dem Türkischen übersetzt haben. Eines der wichtigsten Anliegen dieses Projektes ist es, Übersetzung und ÜbersetzerInnen hervorzuheben, um somit deren Ansehen und Bedeutung in der Gesellschaft zu steigern. Wir hoffen, dass dieses Projekt für türkische, wie auch für LeserInnen aus aller Welt hilfreich ist - insbesondere für ÜbersetzungswissenschaftlerInnen. In Bezug auf dieses Anliegen nimmt die vorliegende Arbeit in der türkischen Wissenschaftslandschaft einen bedeutenden Stellenwert ein, da sie zum einen die erste ihrer Art ist und zum anderen sukzuntigen Arbeiten als Muster dienen wird.

Incorporates the recommendations of the EU Grotius Project 98/GR/131.

A replacement of the author's well-known book on Translation Theory, In Search of a Theory of Translation (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on.Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour – in the appropriate setup – textual components – in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice?This is an excellent book for higher-level translation courses.

Surviving the childhood trauma of his parents' untimely deaths in the early skirmishes of World War I, Mîmtaz is raised and mentored in Istanbul by his cousin İhsan and his cosmopolitan family of intellectuals. Having lived through the tumultuous cultural revolutions following the fall of the Ottoman Empire and the rise of the early Turkish Republic, each is challenged by the difficulties brought about by such rapid social change. The promise of modernization and progress has given way to crippling anxiety rather than hope for the future. Fragmentation and destabilization seem the only certainties within the new World where they now find themselves. Mîmtaz takes refuge in the fading past, immersing himself in literature and music, but when he falls in love with Nuran, a complex woman with demanding relatives, he is forced to confront the challenges of the World at large. Can their love save them from the turbulent times and protect them from disaster, or will inner obsessions, along with powerful social forces seemingly set against them, tear the couple apart? A Mind at Peace, originally published in 1949 is a magnum opus, a Turkish Ulysses and a lyrical homage to Istanbul. With an innate awareness of how dueling cultural mentalities can lead to the distress of divided selves, Tanpınar gauges this moment in history by masterfully portraying its register on the layered psyches of his Istanbulite characters.

Unterwegs zu einer hermeneutischen Übersetzungswissenschaft

Translation, Power, Subversion

A political narrative about life in a world of violence, paranoia, and deception culminates in a disastrous foreign conference, and is accompanied by footnotes and asides that present the observations of four supplemental characters.

Katharina Reiss's now classic contribution to Translation Studies. M ö glichkeiten und Grenzen der Ü bersetzungskritik Kategorien und Kriterien f ü r eine sachgerechte Beurteilung von Übersetzungen, first appeared in 1971. This is the first English translation of this major work, allowing students and practitioners of translation in the English-speaking world to make more extensive use of Reiss's pioneering treatment of a central theme in translation: how to develop reliable criteria for the systematic evaluation of translations. Using a wealth of interesting and varied examples, Reiss offers a systematic and illuminating text typology, a pragmatic approach to text analysis, a functional perspective on translation and a hermeneutic view of the translator, thus accounting for some of the most important aspects of the translation process: the text (both source and target versions), the conditions which determine the translator's decisions, and the translator as an individual whose personal interpretation has to be respected by any critic. In the three decades since Katharina Reiss wrote, the terminology of translation studies has evolved on many fronts. Erroll Rhodes' translation strikes an optimal balance between remaining faithful to the original presentation and using terminology that today's reader would generally understand and value.

This volume presents selected papers from the first symposium on Hermeneutics and Translation Studies held at Cologne in 2011. Translational Hermeneutics works at the intersection of theory and practice. It foregrounds both hermeneutical philosophy and the various traditions -- especially phenomenology -- to which it is indebted, in order to explore the ways in which the individual person figures at the center of the mediating process of translation. Translational Hermeneutics offers alternative ways to understand the process of translating: it is a holistic and strategic process that enhances understanding by assisting the transmission of meaning in and across multiple social and cultural contexts. The papers in this collection accordingly provide a preliminary outline of Translational Hermeneutics. Gathered together, these papers broach a new discipline within Translation Studies. While some essays explain the theoretical foundations of this approach, others concentrate on practical applications in diverse fields, for example literary studies, and postcolonial studies.

Andrew Vincent here offers a comprehensive, synoptic, and comparative analysis of the major conceptions of political theory throughout the twentieth century. It challenges established views of contemporary political theory and provides critical perspectives on the future of the subject.

Lured to post-Communist East Berlin by an inheritance that includes an old apartment building, Eduard, a German scientist, soon finds the city transforming his life in bizarre, absurd ways. 10,000 first printing.

The present book is a bold attempt at revealing the complex and diversified nature of the field of translated literature in Turkey during a period of radical socio-political change. On the broad level, it investigates the implications of the political transformation experienced in Turkey after the proclamation of the Republic for the cultural and literary fields, including the field of translated literature. On a more specific level, it holds translation under focus and explores the discourse formed on translation and translators while it also traces the norms (not observed by translators throughout the 1920s-1950s in two case studies. The findings of the study suggest that the concepts of translation both affected and were affected by cultural processes in the country, including ideological and poetological ones and that there was no uniform way of defining or carrying out translations during the period under study. The findings also point at the segmentation of readership in early republican Turkey and conclude that the political and poetological factors governing the production and reception of translations varied for different segments of readers.

Between Ethics and Aesthetics

The Storm

Divination is any ritual and its associated tradition performed in order to ask a more-than-human intelligence for guidance. A universal human practice, it has received surprisingly little academic attention. This interdisciplinary collection by leading scholars in the field is dedicated to fascinating new insights into divination and oracles arising from recent work in anthropology, religious studies, history and classical studies. Central importance is given to the practical and theoretical perspectives of diviners as well as scholars of divination; several contributors are both. This book explores philosophical issues such as the nature of divinatory intelligence, the relationship between divinatory and metaphorical truth, the primacy of ontology over epistemology, the importance of reflexivity in scholarly studies of divination, and astrology as the principal Western form of divination. The ethnographic and historical examples range from contemporary Nigeria, urban Cuba, Mayan Guatemala and the shamanic cultures of the circumpolar Arctic to classical Greece and ancient Judea.

What are alternative media? What roles do alternative media play in pluralistic, democratic societies? What are the similarities and differences between alternative media, community media, civil society media and rhizomatic media? How do alternative media work in practice? This clear and concise text offers a one-stop guide through the complex political, social and economic debates that surround alternative media and provides a fresh and insightful look at the renewed importance of this form of communication. Combing diverse case studies from countries including the UK, North America and Brazil, the authors propose an original theoretical framework to help understand the subject. Looking at both ' old ' and ' new ' media, the book argues for the importance of an alternative media and suggests a political agenda as a way of broadening its scope. Understanding Alternative Media is valuable reading for students in media, journalism and communications studies, researchers, academics, and journalists.

In his analysis of the deep social trends rooted in production, consumption, and the symbolic, Jean Baudrillard touches the very heart of the concerns of the generation currently rebelling against the framework of the consumer society. With the ever-greater mediatization of society, Baudrillard argues that we are witnessing the virtualization of our world, a disappearance of reality itself, and perhaps the impossibility of any exchange at all. This disenchanting perspective has become the rallying point for those who reject the traditional sociological and philosophical paradigms of our age. Passwords offers us twelve accessible and enjoyable entry points into Baudrillard ' s thought by way of the concepts he uses throughout his work: the object, seduction, value, impossible exchange, the obscene, the virtual, symbolic exchange, the transparency of evil, the perfect crime, destiny, duality, and thought.

The first English translation of Waldenfels' work on the human experience of the alien, or the "other".

Translational Hermeneutics

Rereading Schleiermacher: Translation, Cognition and Culture

The Politics and Poetics of Translation in Turkey, 1923-1960

A Novel

The Nature of Political Theory

Divination

This textbook is a practical and interactive reader designed to give anyone interested in language and communication a rigorous yet accessible head-start to the emerging field of translation. Organised along neat paradigms and models, the book features fresh applications of a wide range of theories, drawing on authentic examples from a multitude of languages. With its strong emphasis on how translation operates in real-world situations, the book is a useful reference not only for students, instructors, and practitioners of translation, but also for the general reader who is curious about the intricacies of communicating across languages and cultures.

This book celebrates the bicentenary of Schleiermacher ' s famous Berlin conference "On the Different Methods of Translating" (1813). It is the product of an international Call for Papers that welcomed scholars from many international universities, inviting them to discuss and illuminate the theoretical and practical reception of a text that is not only arguably canonical for the history and theory of translation, but which has moreover never ceased to be present both in theoretical and applied Translation Studies and remains a mandatory part of translator training. A further reason for initiating this project was the fact that the German philosopher and theologian Friedrich Schleiermacher, though often cited in Translation Studies up to the present day, was never studied in terms of his real impact on different domains of translation, literature and culture.

Ideology has become increasingly central to work in translation studies. To date, however, most studies have focused on literary and religious texts, thus limiting wider understanding of how ideological clashes and encounters pervade any context where power inequalities are present. This special edition of The Translator deliberately focuses on ideology in the translation of a rich variety of lesser-studied genres, namely academic writing, cultural journals, legal and scientific texts, political interviews, advertisements, language policy and European Parliament discourse, in all of which translation as a social practice can be seen to shape, maintain and at times also resist and challenge the asymmetric nature of exchanges between parties engaged in or subjected to hegemonic practices. The volume opens with two ground-breaking papers that investigate the nature and representation of truth and knowledge in the translation of the sciences, followed by two contributions which approach the issue of shifts in the translation of ideology from the standpoint of critical linguistics and critical discourse analysis, using data from political speeches and interviews and from English and Korean versions of Newsweek. Other contributions discuss the role that translation scholars can play in raising public awareness of the manipulative devices used in advertising; the way in which potentially competing institutional and individual ideologies are negotiated in the context of interpreting in the European Union; the role translation plays in shaping the politics of a multilingual nation state, with reference to Belgium; and the extent to which the concepts of norms and polysystems may be productive in investigating the link between translation and ideology, with reference to Chinese data.

Language-specific entries relate to the interaction between the Chinese-speaking and English-speaking communities of Hong Kong. At the same time, the work draws on Western knowledge and experience with translation studies in general. This book is a valuable reference for translators, scholars, and students of translation studies.
