mass, and its experimentally determined molar mass is 196 g/mol.

This test covers the mole, particle and mole conversions, molar mass with elements, molar mass with compounds,

empirical formula, molecular formula, percent composition, and vocabulary.

Learn about how to balance chemical equations, and how to use balanced chemical equations to do

stoichiometry and molecular composition calculations. If you're seeing this message, it means we're having trouble loading external resources on our website.
