chapter-7-the-nervous-system-study-guide-answer-key

The nervous system plays an important role in homeostasis by carrying information from many sensory receptors to controllers and by carrying efferent information to muscles and glands. Flow down gradients.
Describe the concentration and electrical

gradients that exist at resting membrane potential.

Chapter 7: The Nervous System

Flashcards | Quizlet

Nervous system. Divided into: Central

Nervous System: brain and spinal cord.

Peripheral Nervous System: Cranial and

spinal nerves; nerves, ganglia, and nerve plexuses (outside of CNS) neurons and glial cells. Tissue is composed of neurons that conduct impulses and glial cells that support the neurons. Neurons.
