Chemical Kinetics Factors That Affect Reaction Rates • Physical State of the Reactants In order to react, molecules must come in contact with each other. If the reaction is happening between a solid and a liquid it will react only on the surface. The more homogeneous the

mixture of reactants, the faster the molecules can react.

Answers: 1. (a) When we compare the results of experiments 2 and 3, we see that when [B] doubles, the rate doubles, so the reaction is first order with respect to B. Experiments 2 and 3 prove that the rate must double when [B] doubles. Knowing this, we can see that when the rate doubles from experiment 1 to 2, it must be because of B, and the
